after Mr. Mondale amounced that he asked Ms. Ferraro to run on the Democratic ticket with him in November.

Moscow **Gives Bonn** Warning On Arms

By Dusko Doder Washington Post Service

MOSCOW — The Soviet Union said Thursday that it had warned West Germany against developing its own strategic aircraft and longrange missiles. It insisted that Bonn observe arms restrictions imposed at the end of World War II.

An official memorandum, delivered Tuesday in Bonn, asserted that the Soviet Union expected West Germany "to take this address most seriously and to weigh carefully all those negative consequences that would inevitably arise" should it take advantage of a decision by its West European allies to lift a ban on West German

The West European Union, which comprises seven North Atlantic Treaty Organization countries, decided last month to lift the ban, which was one of the last remaining arms restrictions imposed on the defeated Nazi Germany at the 1945 Potsdam conference.

A Soviet Foreign Ministry spokesman, Vladimir Lomeiko, said the Western decision contradicted agreements reached by the wartime allies. He said the Soviet Union intended to act "either together with others, or, if necessary unilaterally" to make sure that these agreements were not violated.

Moscow also made representations to its wartime allies, the United States, Britain and France. Other approaches were made to Italy. Belgium, the Netherlands and Luxembourg, all members of the West European Union.

West Germany replied to the Soviet statement Thursday by accusing Moscow of hypocrisy. The Associated Press reported from Bonn. A statement given to Am-bassador Vladimir S. Semyonov said West Germany "has given a clear, absolute and, in contrast to Soviet behavior, never-vintated declaration of renunciation of

[Government sources said it was the first time the Soviet Union had delivered such a memorandum since the two countries signed a 1970 treaty to normalize relations. In its reply, Bonn repeated its in-tention not to build conventional missiles or bombers, and it said this

intent had not been changed.]
According to the text of the Soviet demarche, which was made public by the press agency Tass, Moscow asserted that Bonn's assurances that it was not going to exploit the Western decision not change the substance of the

matter. "Whenever West Germany has. had any restrictions lifted," it said, "it has used it to build up its military potential which has long exceeded the sensible defense needs of the federal republic."

West Germany is securing the possibility to develop and deploy its own long-range offensive weapons capable of posing a threat to the security not only of its neighbors but also of distant states," it

It linked "this new dangerous step" to the deployment in West Germany of NATO medium-range unclear missiles, which it described as "strategic American first strike" arms directed at the Soviet bloc.

The demarche said Bonn's decinons were in "direct contradicto its public pronouncements, giving rise "to a legitimate question bout the aims and direction" of West German poncy.

"It should be recalled in this conection," the statement said, "that desolving on the Federal Republic of Germany, as one of the legal hers to the former reich, is the monotonest, established by the standard agreement, that no threat to the world. Britain Expels 2 Nigerian Diplomats, Bars Envoy for Role in Abduction

By Jo Thomas New York Times Service

LONDON - Britain said Thursday it has told the Nigerian ambassador not to return to Britain and ordered two Nigerian diplomats to leave the country.

missioner, General Haldu Hananiya, had flown to Lagos on Wednesday night after meeting with British officials.

The British authorities had wantthe embassy staff in connection with the July 5 kidnapping of Umaru Dikko, the former Nigerian transport minister, who was found at Stansted Airport, near London. Oyedele, a counselor, arrived in

The Nigerian government turned down the request, Sir Geoffrey Howe, the British foreign secretary, It is rare for Britain to expel told the House of Commons on Thursday,

"In view of the fact that the full extent of the High Commission's involvement has not been estab-The ambassador, or high comlished," Sir Geoffrey said, "it would in my view be inappropriate for the high commissioner to return to this country.'

He would not say whether the ed to question several members of two who are being expelled were the embassy staff in connection directly implicated in the kidnapping. One of them, Okon Edet, an attache who came to Britain in 1980, was at the airport when the drugged and unconscious in a crate crate was opened. The other, Peter

Antibodies Used in Tests To Detect Cancer Earlier

By Philip J. Hilts.

Washington Post Service WASHINGTON - Doctors have reported that a new technique has been used to accurately spot cancer in a patient's lymph node that was mvisible through other detection methods, including direct examination during surgery.

The discovery of the cancer came by accident in experiments with the new "monoclonal antibody" technique, which sends special radioactive antibodies through the body. The antibodies seek out cancer cells and attach themselves only to those kinds of cells. Then, the radioactive "hot spots" where the antibodies have lodged can he photographed through the use of X-rays.

Performed by the Fox Chase Cancer Center and the Wistar Institute in Philadelphia, the experiment was reported .Thursday in the New England Journal of Medicine. A woman who had colon cancer was injected with the "bot" antibodies to detect the apparent spread of the cancer from her colon to her liver. To the surprise of the doctors, said Dr. Philip J. Moldofsky of the Fox Chase center, the tests showed cancer in a lymph node near one of her

kidnevs. The node was normal size and appeared normal even when examined during surgery because the microscopic spots of cancer were still at ton early a stage to be detected through Xray techniques.

Because antibodics from breast cancer can be sent to search out breast cancer, and colon tumor antibodies can search out colon tumors, widespread early diagnosis of cancers may soon be possible with the technique, Dr. Moldofsky

The technique involves taking a sample of tumor cells, putting them in mice, which produce antibodies against the cells, and then growing cells from the mice in glass dishes. The mouse cells, when fused with a kind of cancer cell that never dies, will produce cells with antibodies that attach to the specific type of cancer cell originally taken from a person, and not to other kinds of cells.

In the same issue of the medical journal, Dr. Gordon D. Luk and Dr. Stephen B. Baylin of Johns Hopkins School of Medicine in Baltimore reported find-ing in 13 patients elevated amounts of an enzyme that is associated with the formation of colon and rectal cancer.

The removal of the enzyme. ornithine decarboxylase, has already been shown to halt the growth of colon and rectal cancer in tissue culture and in animal tests, but not in humans Dr. Luk and Dr. Baylin said they have found that in people with intestinal polyps, a precancerous condition, the level of the enzyme is about double the level in people without the

polyps.

Dr. Luk said he hoped the work would lead to a diagnostic "marker" that would allow early detection of the disease.

Pro-Syria Groups Clash In Lebanon; 12 Killed

New York Times Service

day in northern Lebanon for the the intensity of the lighting. second consecutive day between two pro-Syrian factions. Damascus has caused deep concern among an effort to end the conflict.

Police said 12 people were killed and 15 wounded in clashes in the district of Koura between followers of former President Suleiman Francieh and the militia of the National Syrian Social Party.

Artillery, rockets and heavy machine guns were used in the exchanges, which occurred in 10 villages and the town of Amioun, the capital of the district, about 25 miles (40 kilbmeters) north of Beirut. Shells fell on the coastal highway just south of the port of Tripoh

in Lebanon.
The state-run Beirut Radio said

Hartey Agents

and that fire brigades had been BEIRUT—Battles raged Thursunable to reach them because of

sent a special envoy to the region in government officials. Prime Minister Rashid Karami was on the telephone all day Thursday with various leaders to try to end the battles. Beirut Radio reported.

Officials say the fighting might spread to other areas, especially after last week's clashes in the mainly Moslem port of Tripoli between pro- and anti-Syrian factions. Thirty-five people were killed in the

The tension in Koura also coincided with efforts by President Amin Gemayel and the cabinet to consolidate a security plan that Lebanese Army began applying in (Continued on Page 2, Col. 2)

diplomats from Commoowealth countries. The last such expulsion was when relations were broken off with President Idi Amin of Uganda. But Thursday's move fell short of a break in diplomatic relations and was seen by diplomatic and other observers as an effort to minimize tension between the two countries in the future.

British police have said they want to question four more people in connection with the kidnapping. They did not identify them. Sir Geoffrey told the House of

Commons that the two envoys expelled Thursday were ousted because of Nigeria's refusal to allow them to be questioned and that there was no point in keeping them in the country. If the names of the two men were to come out during the trials of four men alread charged in the kidnapping, Brit-ain's only recourse, under the protocols of diplomatic immunity,

would be to expel them anyway. There was a public outery earlier this year when the British anthorities had to let the killer of a policewoman return to Libya because he had shot her from the sanctuary of the Libyan People's Bureau, as the country's embassy is known.

"The present situation is not of our making." Sir Geoffrey said Thursday, but "Her Majesty's Government is bound to take the gravest view of any evidence which appears to implicate members of diplomatic missions in serious crimes in this country." Mr. Hananiya flew to Lagos on

Wednesday night after his third meeting with Sir Antony Acland. the head of the British diplomatic service. Moses Ekpo, director of information for the Nigerian embassy, said he was being recalled The Nigerian government has

denied any involvement in the kid-napping of Mr. Dikko. whom Mr. Ekpo has described as one of the 15 men whom the present government would most like to put on trial for corruption.

The military regime, which seized power Dec. 31 from Mr. Dikko's brother-in-law, President Shehn Shagari, has accused Mr. Dikko of stealing millions of dollars while managing the distribution of rice during a shortage.

One Nigerian diplomat and three Israelis have aleady been charged with kidnapping and drugging Mr. Dikko and are to appear in court July 19. The diplomat, Mohammed Yusufu, was not accredited in London, according to the described by their attorneys as businessmen, Mr. Barak, whn lives in Lagos, has both Israeli and Nigerian passports.

Mondale Names Ferraro As His Running Mate Mondale has made." Mr. Jackson crai of Massachusetts who is speak-

ST. PAUL, Minnesota - Walter F. Mnndale, the likely presidential nominee of the Democratic Party, announced Thursday he has chosen Representative Geraldine A. Ferraro of New York as his running mate. It was the first time a woman has been chosen to run for vice

president on the ticket of a major U.S. party. "I looked for the best vice president and I found her," Mr. Mondale said at a press conference at the Minnesota state capitol.

"Like most Americans, she's worked hard for everything that she's achieved," he said. "She has a strong family life, deep religious convictions, and working Ameri-cans of average income will find in her a vice president who knows them and who will fight for them." "History speaks to us today. Our

founders said in the constitution. "We the people,' not just the rich or men or white, but all of us," be said. Ms. Ferraro, 48, said her selection "says a lot about where the country has come and about where we want to lead it."

"American history is about doors being opened," she said. "There is an electricity in the air, an excitement, a sense of new possibilities and of pride."

The Democratic National Convention opens Monday in San Francisco, and the delegates are expected to accept the Mondale-Ferraro ticket to challenge President Ronald Reagan and Vice President George Bush in the fall

The Democratic national chairman, Charles T. Manatt, said he thought the dramatic choice might make the difference in the campaign. Recent polls have shown Mr. Mondale trailing Mr. Reagan. But a poll taken earlier this year

by The New York Times and CBS News, and another conducted last week by The Washington Post and ABC News, indicated the presence of a woman on the ticket could be of no advantage to the Democrats. The Post-ABC poll, for example, showed that 15 percent of those

surveyed said they would be more likely to vote for Mr. Mondale in that event, while 15 percent said ther would be less likely to do so.

Mr. Mondale had used his lengthy vice presidential selection process to expand the search beyond the traditional group of white

male politicians. He interviewed three women, two black men, a Hispanic man and a white man. His decision to disclose his choice in advance of the convention was extremely rare. He noti-

fied Ms. Ferraro by phone Wednes-day. She immediately accepted the offer and flew overnight to Minnesota for the news conference. She had mounted something of a campaign to get the post, and prominent women leaders had

sought to pressure Mr. Mondale in recent weeks on her behalf. Mr. Mondale's rivals for the nomination and other prominent Democrats praised the announce

ment of Ms. Ferraro as his running mate. But Republicans were quick to attack her on the issue of suitability for office. Senator Gary Hart said. "Geral-

dine Ferraro would make an excel-lent vice presidential nominee, and her selection is a significant advance for women in American poli-

seek the nomination at the Democratic convention.

"The selection of a running mate will give the delegates an additional opportunity to judge Mr. Mondale, but in the end, I believe the delegates at the convention will base erties."
The convention oo which presidential candidate has the best chance to the president said, would be sub- tial opposition either within the government.

defeat Ronald Reagan this fall," Mr. Hart said in Washington. The Rev. Jesse L. Jackson, who had criticized the pressure womens'

groups had exerted on Mr. Mondale, said Ms. Ferraro's selection made him "more enthusiastic" about the Democratic ticket. "A nation 53 percent female and a party 53 percent female has to have a breakthrough and allow a

woman to have first class status." he said in a television interview. "I think it's a rather courageous and exciting move Vice President

Washington Past Service WASHINGTON — Daniele Spengler says she and her French colleagues have to be a bit more careful about how they spend their pay-

Charles Anson of the British Embassy comments on how, three or four years ago, people could save money "on a posting in Washington, but now it's more difficult." West German and Japanese diplomats agree that economic times are not as good as they used to be.

Diplomats from several countries are feeling the pinch because their salaries are paid at home, in their local currencies. When they transfer money to the United States, they get fewer dollars than they used to because of the steady rise of the U.S. dollar against foreign currencies. But these envoys, most of whom are represen-tatives of major U.S. allies in Western Europe, with industrialized economies and strong currencies, appear to he in the minority.

The majority of envoys in the city are paid in U.S. currency at a predetermined fixed salary. Nepal, Botswana, India, Israel, Argentina, Bulgaria and Czechoslovakia are among the nations that follow the procedure. "The rising dollar, if anything, gives us the same purchasing power as the Americans." said

Yosef Yaakov, an Israeli Embassy spokesman.

which are not as rich as Europeans have fared

Paradoxicially, diplomats from countries

whose salaries are paid into their French bank accounts in francs, "We've been getting less dollars, yes, much less," said Miss Spengler, the press attaché. "We generally lose. I think that so far we are earning less in absolute quantity than we did under the Carter administration.

French diplomats are allowed to transfer their money at a special "diplomatic exchange rate" set by the French Ministry of Finance, which compensates somewhat for the fluctuations, Miss Spengler said. But "the situation is tough when the dollar is high," she said. "Not everyone here is complaining, but everyone feels

better," said a Latin American diplomat, who months, a "trigger mechanism" gives embassy did not wish to be identified. He gets paid in staff a retroactive cost-of-living increase, Mr.

Spaniards also get compensation for their losses at the end of the year, according to the Spanish press counselor, Enrique Garcia Her-

The West Germans, paid in Deutsche marks at home, are also compensated for their losses, but only partially. Their compensation is computed on 60 percent of their salary, said Eberhard Heyken, the press officer, because "they calculate that we Germans do not spend 100 percent of our salaries in the U.S."

As in most Washington embassies, Americans who work at the West German mission are paid in dollars. But there are several Germans residing permanently in the United States who work at the embassy in nondiplomatic positions and are paid in Deutsche marks They "suffer considerably," Mr. Heyken said, because the compensation for the exchange loss

is computed on only 60 percent of their salaries. although they spend all of their salaries in the United States Yasu Kawamura, the Japanese press officer, adopted perhaps the most philosophical out-

look. Although Japanese salaries are affected by the dollar's movement, "if you look at it in the The British are cushioned somewhat by the long-term viewpoint, sometimes the dollar apdollar fluctuations, because whenever the Brit-ish pound declines in value 10 percent over three evens out."

Polish Dissident Looking for Forum to Discredit Regime

By Michael T. Kaufman New York Times Service

WARSAW - Since martial law was imposed in Poland in December 1981, letters smuggled out of prison by Adam Michnik, an adviser to Solidarity, have helped sustain

hope in the outlawed movement. Mr. Michnik is scheduled to go on trial Friday. It is a trial that the authorities tried to avoid by offering him freedom and the right to go abroad. It is a trial that Mr. Michnik demanded.

The smuggled letters by Mr. Michnik, 38, have been copied by hand, typed, mimeographed or printed in clandestine shops. They have been widely read and dis-

The letters analyze the impasse in which the people and the government seem unable to move forward or to influence each other. They review what he sees as the mistakes of Solidarity. At times, they accuse the Roman Catholic Church of umidity in defending political pris-

From the prison cell he shares with three men convicted of com-mon crimes, Mr. Michnik has continued the debate between state and society, the debate that General Wojciech Jaruzelski, the Polish leader, tried to suppress when he ordered troops into the streets on the night of Dec. 12, 1981.

Most of all, Mr. Michnik has insisted on his day in court to answer charges that he was preparing to demolish the system by force." Last mouth, the military court for the Warsaw district set the trial date for him and three

One of the co-defendants is Jacek Kuron, 50, who was Mr. Michnik's mentor. For 20 years, Mr. Kuron tried to democratize Po-land's institutions, first from witbin the ruling Communist Party and then from without - from jails.

factories and Solidarity meetings.

The other defendants are Henryk Wujec, 43, a physicist who was a strike leader during the emer-gence of Solidarity in 1980, and Zbigniew Romaszewski, 41, also a physicist, who set up Solidarity's

clandestine radio station. The four were members of a dis-

sources say that the government does not really want a trial at a time when it is seeking conciliation. They say that the defendants may turn prosecutor, raising questions of law, history and honor and hold-

ing a mirror up to their accusers. Mr. Michnik wrote from prison last fall: "The trial cannot discredit us, but it can discredit them."

Research Links **Bourbon to Male** Sex Problems

The Associated Press PITTSBURGH - Plant hormones found in bourbon have the same physiological effect as and may explain why heavydrinking men develop feminine characteristics, a University of Pittsburgh researcher said.

The plant bormones are found in corn, from which bourbon is made, Judith Gavaler, a research associate, said Wednesday. The findings by Ms. Gavaler and four colleagues are the latest of a 12year series of studies on the links between beavy drinking and feminization. Earlier, researchers had found that many alcoholics suffer from impotence, loss of facial hair and lower levels of the male hormone testosterone

In experiments, bourbon affected female laboratory rats much like estrogen, stimulating the growth of the uterus and Fallopian tubes and decreasing the rats' levels of gonadotro phin, a hormone that acts on the testes or ovaries to promote production of sex hormones.

New Fighting In Lebanon

(Continued from Page 1) Beirut and its suburbs during the past week.

Private radio stations reported that Mr. Franiich's militia, the 600member Marada Brigade, attacked the offices of the National Syrian Social Party and ordered the occupants to surrender. The party's defenders were putting up stiff resistance in the main square of Amioun, a mainly Greek Orthodox town, the radio stations said.

Mr. Franjich's private radio station, Voice of Free Unified Lebanon, said the Marada Brigade acted decisively against those seeking to cause unrest in the north. The station, based in the mountan resort of Ehden, accused unnamed Israeli agents of fomenting sedition.

The National Syrian Social Party, in a statement released to the press, accused a relative of Mr. Franjieh's of mounting the attacks and said the Marada Brigade did not observe a cease-fire arranged Wednesday night.

According to accounts in the Beirut press Thursday, the fighting broke out when two National Syrian Social Party officials were stopped at a roadblock manned by pro-Franjich gunmen. They were reportedly shot, wounded and de-

A special Syrian emissary, Briga-dier General Mohammed al-Kholy. arrived Thursday in Ehden and held a two-hour meeting with Mr. Franjieb in what Beirut Radio said was an attempt to end the violence. General Kholy is adviser on security matters to President Hafez al-Assad of Syria, whose friendship

with the Franjich family goes back many years.

Mr. Franjieh is the only leading Christian Maronite who has been consistent in his support for the Syrians. In 1976, when in office, he invited Syrian troops to come to

Lehanon to belp him against an alliance between Palestinian guerrillas and Lebanese leftists, who were fighting his regime. Mr. Franjieh fell out with other Maronite leaders when his eldest son, Toni, was killed six years ago

"On the night of Dec. 12, the assment for the government. Over Communist elite decided desperrevive the idea of a Communist utopia. It was an anti-workers' counterrevolution, organized in the name of the conservative interests

of the ancien regime." The assessment has the tone of the old left intelligentsia, a heritage that Mr. Michnik acquired through birth. He is the son of Osias Szechter, a prewar Polisb Communist who spent time in prison. He uses the name of his mother. Helena Michnik a historian.

Mr. Michnik studied history at the Universities of Warsaw and Poznan. He was arrested the first time during student protests in 1968 and again in 1977 with Mr. Kuron and eight other KOR orga-aizers who were establishing links to workers' groups.

PARIS BOMBING - A bomb exploded Thursday morning outside the Paris headquarters of the Atlantic Institute for International Affairs, a private research center. A leftist guerrilla group known as Direct Action claimed responsibility for the attack. The bomb beavily damaged the front of the building, but no injuries were reported.

Dock Strike in Britain Intensifies; 54 Ports Closed

By Michael Getler Washington Post Service

LONDON - The British luxury liners Queen Elizabeth 2 and Canberra will not be able to dock at their home port of Southampton but will be diverted to Cherbourg, France, it was announced Thursday as Britain's dock strike spread to more ports and tightened its grip

on virtually all British sea trade. Now in its third day, the strike by more than 35,000 dockworkers has closed down about 54 ports, which normally bandle 70 percent of British imports and exports that move by sea. Union officials said they were shooting for a 100-percent blockade.

The walkout, which seemed to take the British government and the public by surprise, has further heightened labor, financial and political tensions in Britain. It comes on top of an 18-week coal miners' strike that still seems far from settlement and at a time when the British pound has plunged to re-

raising interest rates to try to stem the pound's decline.

In 1972, a 10-week dock strike cut all British exports by one-third and led to a state of emergency being declared by the former conservative prime minister, Edward Heath.

Authorities said Thursday that Britain has ample reserves of many commodities, and it might take several weeks to run out. But businessmen and the Chambers of Commerce Association were forecasting serious effects on trade if the strike goes on much longer. "A dock strike in a couple of

weeks is going to have much more impact than 17 weeks of a miners strike," the association said. Share prices on the London Stock Exchange dropped Thursday to their lowest level since Jan. 4, and at one point the stock index made the largest single one-day de-cline in the last 10 years before

recovering.

for an interim period.

The deal highlighted the current visit of Kuwait's defense minister, Sheikh Salem al-Sabah, to Moscow at the head of a military delegation. Informed sources said the deal comprises surface-to-air missiles, in addition to other undisclosed types of military hardware.

The newspaper Al-Qabas quoted the sheikh as saying that the agreement does not give the Russians any military facilities in Kuwaiti territory or waters. According to the deal, as reported by Al-Qabas, Soviet military experts will be stationed in Kuwait to assemble military equipment, operate them and train Kuwain personnel.

Taiwan Coal Mine Toll Reaches 99

TAIPEI (Reuters) - Rescuers have brought to the surface the bodies of 99 miners killed in a fire in a coal mine, police reported Thursday.

Twenty-two survivors have been found, some of them suffering from carbon monoxide poisoning. Rescuers were still searching the Mei-Shan pit at Juifang. Police said three or four more workers might still be in the mine, bringing the total number of those trapped by the fire to 124 or 125.

The government has ordered all 110 mines oo the island closed for safety checks. The fire was the second mine disaster in Taiwan in three

Bonn Aide Cautions U.S. on Pressure

WASHINGTON (Combined Dispatches) — Delense Minister Manfred Worner of West Germany signed an agreement Thursday for the purchase and deployment of U.S.-built Patriot and German-Freach Roland anti-aircraft missiles. But he warned the United States against trying to browbeat Western Europe into spending more on defense.

Mr. Worner said U.S. critics of allied spending levels should drop the notion "that you are doing us a favor" by stationing U.S. troops and weapons in Europe. "We are also doing you a favor," he said. "The

United States without Europe would lose the base of its world position, perhaps even the basis of its own freedom." Commenting on the U.S. Senate's demand last month for more European spending, Mr. Wörner added, "If we now increase in our country the contributions, we have to live with the accusations of many that we do it under American pressure, that we are no more sovereign in

do it." (Reuters, AP, UPI)

Opposition Rebuffs Sandinist Move MANAGUA (UPI) — The Nicaraguan government has increased media access time for opposition parties in the November elections but they have maintained their refusal to participate unless a two-year state

of emergency is lifted. Nicaragna's 50-member Council of State, an appointed legislative body dominated by the ruling Sandinist Front, announced Tuesday that access would be increased for the Nov. 4 elections for a president, vice Tass said the White House was president and 90-member Constituent Assembly.

The concession extended daily time allowed each party from 15 to 22 minutes on television and from 30 to 45 minutes on radio during the July 31-Oct. 31 campaign period. Bul a coalition of the Social Christian, Social Democratic and Liberal Constitutional parties and labor and business groups rejected the concession Wednesday. The state of emergency law bans political rallies and provides for media censorship.

U.S. Shuttle Flight Set for August

president; a New York Times-CBS News poil taken at the same time d Mr. Reagan ahead by 15 points. Those surveys caused some observers to say that the bottom had fallen out of the Democrats' campaign even before the party had officially selected its presiden-

tial nominee.
The latest Louis Harris poll, however, showed Mr. Reagan lead-

ing by just eight points.

Polls at this early stage are not regarded as very meaningful in predicting the outcome of an election but the findings still could be of major political importance. Surveys that show the Democrats with a decent chance against Mr. Rea-gan could spark enthusiasm and unity among convention delegates. and the tone set at national conven-

Reagan Stresses Need To Reconcile Social **Goals and Conservation**

By Cass Peterson Washington Post Service

WASHINGTON - President Ronald Reagan angered environ-mentalists Wednesday by saying that the nation was making progress toward cleaner air and water but that conservation interests must be reconciled with other "legitimate social goals."

Quality of life also means a good job, a decent place to live, accommodation for a growing population and the continued economic and technological development essential to our standard of living," Mr. Reagan said at a ceremony marking the release of a White House report on the environment.

His comments, made on Theo-dore Roosevelt Island in the Potomac River on the second of three days of events designed to soften criticism of his environmental poli-cies, drew angry response from en-vironmeotalists and a sarcastic "counter-report" from Senator Gary Hart of Colorado, a Demo-cratic presidential candidate.

"If Teddy Roosevelt were alive today," Mr. Hart said, "he'd strongly object to having his name linked with Ronald Reagan's policies of protecting polluters instead of the environment."

conservationist group, called the ceremonial signing of the White House report, written by the Council on Environmental Quality, "an extraordinary event."

The president tried to abolish attended the ceremony. "He cut the budget from \$3 millioo to

mentalists have criticized the council's annual reports as politically motivated. Last year, the nonpartisao Cooservatioo Fooodatioo started issuing its own annual reports on environmental trends, citing a oced for "reliable, credible.

objective data." Mr. Reagan echoed the theme of this year's report, released to the press later with his signature.

"We must and will be responsible to future generations, but at the same time let us remember that quality of life means more than protection and preservation," be said, quoting Roosevelt as saying "Conservation means development as much as it does protection."

The president did not mentioo

toxic waste or acid rain, two issues central to heated environmental controversies that have plagued his administration. He said his administration has made progress in cleaning up the environment.

"By almost any measure," Mr. Reagan said, "the air is cleaner now than it was when the Clean Air Act was passed 14 years ago. We've also seen improvement in the quality of surface water all across the coun-

Ex-Guerrilla Says Salvador Rebels Armed By Nicaragua

By Hedrick Smith

WASHINGTON - A former Salvadoran guerrilla commander who was captured in Honduras says that virtually all the arms received by the rebel units he led came from Nicaragua.

The former guerrilla, Arqui-medes Canadas — known in the rebel movement as Commander Alejandro Montenegro — also bolstered on Wednesday the Reagan administration's disputed assertions that Salvadoran guerrillas have their beadquarters in Nicara-gua. Mr. Canadas said that he went there secretly in 1981 and met with his top commander, the Nicara-guan Army chief of staff and four Cuban advisers.

Mr. Canadas, 29, said in an in-

fills units under his command in-San Salvador and north of the city received "99.9 percent of our arms"

from Nicaragua. This contradicts what several guerrilla commanders, including Mr. Canadas, said in interviews at their mountain base near the Guazapa volcano in February 1982.

Armed with U.S.-made M-16 rifles, the Salvadoran rebel commanders said their weapons were cither captured from government forces, bought on the black market or purchased directly from Salvadoran government officers. Only one acknowledged having gone to Nicaragua and none said they had

But Mr. Canadas said Wednesday that he had been under orders from his guerrilla commander in chief to give false information in 1982 by saying that the arms were captured or purchased when in fact they had come from Managua by truck across Honduras into El Sal-

Mr. Canadas, who was captured in August 1982 by Honduran Army units in Tegucigalpa while en route to Nicaragua, said be had gone to Cuba once and to Managua twice to meet with Joaquin Villatobos, commander in chief of the People's

Terrorism Is Spreading

In a hrazen operation last week, a political exile in London was kidnapped, drugged and jammed into an air crate labeled as diplomatic baggage. But the culprits were not working for Libya's Colonel Qadhaft; they were apparently agents of the Nigerian military regime led by General Mohammed Buhari, a man with a moderate's reputation. And held as accomplices were three citizens of Israel, where terrorism is the foulest political word. What hitter evidence that terrorism is not just a disease of

the most despised ideologies Terrorism is spreading and threatening civilization everywhere. From Rangoon to Athens to Rome. Paris and London, these are days of the jackal. The very norms that civilized na-tions invented to resolve their disputes diplomatic courtesies and immunities - are being exploited for primitive vendettas.

Sadly, despite all their cries of alarm, civilized nations have failed to agree on even the simplest steps to deter terrorists and punish governments that sponsor and harbor them.
At last month's London summit talks, the industrial democracies said they were "disturbed" by the ease with which terrorists move across boundaries, and they promised closer coordination in intelligence. That, however. remains only a pious aspiration. There is no centralized file listing known terrorists or fugitives like Mehmet Ali Agea, who wandered

freely through Europe before he sbot the pope. Security services board their secrets. Except

for random "red notices" distributed by Interpol, there is no real pooling of information.

The London declaration pledges coopera-

tion in expelling known terrorists, including those disguised as diplomats. After the Libyan Embassy in London was turned into a lethal bunker by such "diplomats," Britain urged the democratic countries to blacklist them out of their embassies. Washington expressed interest but sull has no official opinion. Instead of feasible and practical measures, the Reagan administration advocates making it a crime for a U.S. citizen to "act in concert" with terrorist organizations. But that only affects association with unpopular groups, without striking at acts of terror. Nor does it even try to distinguish between helping terrorism and rebellion.

These are not easy problems. No one, for example, has found a satisfactory punishment to fit a bizarre crime like the abduction of Umaru Dikko, the Nigerian exile. If Nigeria is guilty, its embassy could be closed, but Britain would still have to deal with Africa's most populous nation. Britain can expel any guilty diplomats" and even try their accomplices; but what if these turned out to include an arm of the Israeli government?

The odium of exposure remains the best available response to these outrageous acts. But more effective remedies are needed, particularly by the most open and therefore most

- THE NEW YORK TIMES.

Jackson Is Overdoing It

Jesse Jackson's candidacy is not going gent-ly into any good night. As is his right, he is going to the convention to see his name placed in nomination, to see his delegates vote for him and to speak to the nation. A year ago none of those things seemed likely to happen in San Francisco, But Mr. Jackson aims to do more. He insists that he is not threatening the Democrats with disunity, and points out that he has never spoken of a "walkout" from the Democratic Party. But be threatens things that

amount to a withholding of support.

He insists that he will send a "signal" to his constituency about the "degree of support they should give the Democratic ticket this year, and that the signal will depend on the fairness" with which he is treated at the convention. The threat is that if the Mondale forces do not treat him as he thinks they should, Jackson enthusiasts will not register new voters and urge others to vote in November. Moreover, Mr. Jackson talks ominously of running "independent Democratic" candidates in various races. Such a tactic, as he notes, has the same potential as his proposal to abolish runoff primaries; to allow a minority candidate, often n Jackson follower, to win. It also has the potential of splitting the Demo-cratic vote, to the great benefit of Republicans.

Mr. Jackson, we think, is entertaining these ideas because, as a practical matter, he cannot credibly threaten to disown the Democrade ticket. He knows that the minute he withholds support or even indicates lukewarmness, he will be under attack from any number of black politicians for betraying black people's interests by helping the cause of Ronald Reagan.

poll confirms: that the constituency be claims is not irrevocably his. The poll showed that Mr. Mondale is preferred over Mr. Jackson by most black voters, including many who voted for Mr. Jackson; they have made their point and they now want to get down to the business of ousting Mr. Reagan. There is something plaintive in Mr. Jackson's assertion that his entire constituency is waiting for his "signal"

before deciding what to do in November. There is something plaintive as well in Mr. Jackson's Realpolitik arguments that attention must be paid to him. The way he is treated, and reacts, can affect hlack turnout, But it is obvious that Mr. Jackson is an electoral liability as well as an asset. To many of the voters without whom the Democrats cannot win, Mr. Jackson is a scary figure, in a way that many other black politicians are not. The thought may have crossed some Mondale strategists' minds that they are better off without the handsraised, smiling pose that Jimmy Carter tried so hard to get from Edward Kennedy in 1980.

All of which is not to say that Mr. Jackson cannot remain a major figure in national politics. He can. But it is not likely that he will remain the cynosure of as many eyes as he has been these last six months or that he will remain what he would clearly like to be — the sole voice of the mostly black Rainbow Coalition he has mobilized in the primaries this year. Mr. Jackson, as he wobbles from confrontation to conciliation, has the look of n man who fears that his moment has passed and is looking for a way to prolong it.

-THE WASHINGTON POST.

Other Opinion

Thatcher Talling on Her Face'

gradually becoming Britain's most inept since the war. The mishaps, mistakes and omissions which have characterized its first full year now have ministers in difficulty with farmers, miners, peers, local authorities, EC allies, even City financiers. Nothing seems to be going right and what goes wrong is increasingly portrayed as somebody else's fault — a sign of ministers losing their grip. Mrs. Thatcher, apostle of strong government and emphatic leadership, still holds the helm, but the rudder is taking on a life of its own.

The government's strengths are still considerable. Its economic strategy is at bottom sound. The new government has n radical chancellor, a reformist home secretary and is producing new thinking on education, transport, health and the social services. Privatization and deregulation are continuing. Nobody doubts Mrs. Thatcher's sense of direction.

Yet Mrs. Thatcher has lost her ability to move in that direction without slipping on a banana skin and falling on her face. She looks alarmingly like Harold Wilson in the closing years of his 1966 administration.

upon mistake. Clearly the glorious days of the

- The Economist (London). The Iron Lady seems to be making mistake Falklands conflict are long gone and the strikers are likely to prove tougher than the Argentinians. For Mrs. Thatcher, just as for other leaders, the dollar and interest rates are insurmountable obstacles at present.

A 'Tide of Reform' in China A strong tide of reform is sweeping across

China. It has been so especially since the May session of the National People's Congres when Premier Zhao Ziyang singled out the need to step up reforms in the urban areas and for a further opening up to the ontside world as the two major tasks in the economic field. Deng Xiaoping rightly noted that the world today is an open world and that it would be impossible for China to build up the country behind closed doors. The opening-up policy will enable China to update and improve her productive forces by absorbing advanced techology and management methods.

It has been shown that reforms in agricultural management, with the peasants having more say in how to farm the land, have led to higher yields, increased productivity and speedier de-velopment. But lurther agricultural growth will be hampered unless corresponding reforms are made in trade, transport, manufacturing and other sectors.

- The China Daily (Beijing).

FROM OUR JULY 13 PAGES, 75 AND 50 YEARS AGO

1909: German Sees 'American Peril' BERLIN - Judge Wilhelm Schwarze, member of the Reichstag from Lippstadt and whose article in Der Tag on the subject of the "American Peril" was reproduced in the Herald from the Daily Mail, has given the Herald correspondent confirmation of his views, "Yes," he said, "the peril would come from America in the case of a war between Great Britain and Germany." "Do you mean that the United Siates would pitch into the fight for one side or the other?" I asked. "Not at all, but the United States would be the winner, and no matter whether Germany won the fight or whether England won it, the United States would win much more. I mean that the aggressive and commercially mercenary spirit of the United States would take its advantage."

1934: Arms Prober Blasts Du Pont WASHINGTON - Senator James P. Pope, member of the Senate committee investigation the traffic in arms and municions, charged [on July 12] that munitions manufacturers were preparing to "flood the country with propa-ganda to protect their swollen war profits." The statement was in reply to n protest made by Irênée du Pont, vice-chairman of the I.E. du Pont de Nemours Company, one of the largest manufacturers of explosives in the United States. Du Pont said the inquiry was inspired by the Third Internationale. Senator Pope ridiculed such a statement. He said the income of the Du Pont company had been increased almost 2,000 percent during the war and hence "there was a strong temptation as a recipient to encourage international strife."

Democratic Calculus, or Why Mondale Could Win HILADELPHIA — The Democratic an win in November. This on pipe dream but the conclusurom a careful consideration of a revealing numbers. By Fred Block and Jerry Jacobs ionately a women's vote, will go be procratic. Mr. Anderson's themes and desired and procratic and states fall into the Democratic and sta

PHILADELPHIA — The Demo-crats can win in November. This is not n pipe dream hut the conclu-

sion Irom a careful consideration of some revealing numbers. The common view that Ronald Reagan is bound to win re-election results from uncritical evaluations of national poll data and misunderstandings about the 1980 election. Opinion polls that show Mr. Reagan substantially ahead of a Democratic opponent will not necessarily convert

into an electoral victory. In 1980 Mr. Reagan carried many states hy slim margins. If we adjust the state-by-state figures for the siz-nble 1980 vote Ior John Anderson, for the emergence of the gender gap and for increased electoral participation by blacks, it is easy to foresee a Democratic victory next November. There is even the ironic prospect that n conservative president might win the popular vote but lose the election in the Electoral College.

Our analysis begins with the as-sumption that Jimmy Carter's perfor-mance in 1980 is a minimum baseline for a 1984 Democratic campaign. Mr. Carter was hurdened with eco-

nomic failure, the Iranian hostage crisis and his personal style. The Democratic nominee will not have these liabilities and will be able to blame Mr. Reagan's incumbency for many of the country's problems.

While some who voted for Mr. Carter in 1980 will certainly switch to Mr. Reagan in 1984, those switches could be more than counterbalanced by the large number of traditional Democratic voters, many of them have collar and Irom mion bouseholds, who supported Mr. Reagan but are now bitterly opposed to him. For victory, a candidate needs 270 electoral votes. In 1980 Mr. Carter carried six states and the District of Columbia with a total of 48 electoral

Columbia with a total of 49 electoral votes. Those states — Georgia, Ha-waii, Maryland, Minnesota, Rhode Island and West Virginia — appear safe for the Democrats.

But there were also quite a few states in which Mr. Anderson's vote played a significant role. It seems plausible to assume that in 1984 the Anderson vote, which was dispropor-

cal integrity and women's rights sylvania. South Carolina and Wis-consin. This brings the Democrats' electoral vote to 259. are all Rengan weaknesses. If the Anderson vote is divided 75-25 between the Democrais and the Republicans, Historically, hlack turnout as a percentage of all eligible hlack voters then the Democrats gain another 76 electoral votes in Arkansas, Dela-

ware, Maine, Massachusetts, New York, Vermont and Tennessee.
In 1980 Mr. Reagan received 47
percent of the women's vote: 43 percent went to Mr. Carter and 10 percent to Mr. Anderson. Using 1980 as our model, and after redistributing the Anderson vote, Mr. Reagan ends up with 49.5 percent of the women's vote, while the Democrats get 50.5 percent. This is a much stronger Re-publican vote among women than indicated by either the 1982 election If we assume a 20-percent incres returns or some recent polls.

If we make the modest assumption that Mr. Reagan would take only 45 percent of the women's vote in 1984,

Mississippi, North Carolina, Penn-

has been low. In many parts of the country only about a third of votingage hlacks cast ballots in 1980. Since the Jesse Jackson campaign and other events have energized the black electorate and increased voter registration, it seems plausible to predict a substantial jump in the percentage of blacks who will vote. If we assume a 10-percent increase, Louisiana and Missouri go Democratic, pushing the Democratic nominee over the top.

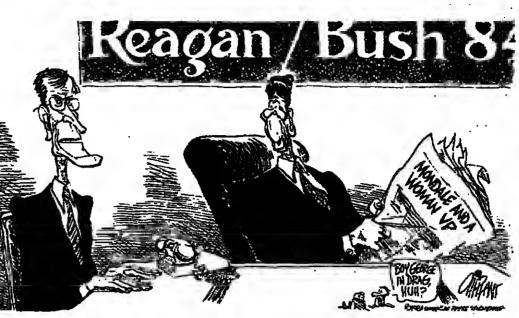

the Democrats could also take Ohio, Virginia and Oregon, resulting in a total of 322 electoral votes. Moreover, when all of these calculations

ment, there is a distinct possibility of n Democratic landshide.

Whether the outcome is a narrow Democratic win in the electoral college, a Democratic landslide or Mr. Reagan's re-election depends on how the campaign unfolds. A lackluster and uninspired Democratic campaign could fail to hold even Mr. Carier's 1980 vote totals. Moreover, Democratic success with the Anderson voters - who bear a remarkable geographical and demographic sun-larity to the Hart constituency cannot be taken for granted.

Still, the electoral arithmetic suggests the votes are there for a Reagan defeat, whatever the polls say.

The writers are sociology professors at the University of Pennsylvania. They contributed this comment to The Washington Post.

'George, I may have to send you out for a sex-change operation.'

Terrorism Again: A Few Things to Do About It

WASHINGTON — Terrorism is having yet another revival as a major political issue. President Reagan and Secretary of State George Shultz have denounced state-supported terrorism and insisted at the economic summit meeting in London that the industrialized de-mocracies collaborate better to bring this under control. Debate is raging over the implications of the Italian prosecutor's report on the attempted sination of Pope John Paul II, which implies that the Bulgarian government, and perhaps even the Soviet government, were behind the attempt.

A hill has been submitted to Congress that would impose criminal sanctions on Americans assisting or training terrorists identified by the secretary of state. Behind these problems looms the

nightmare of possible nuclear terrorism.

This concern is hardly new. We heard much the same unease and the same call for a definitive remedy after the PLO's nttack on the Munich Olympics in 1972, the Red Brigades' kidnapping and murder of former Italian Prime Minister Aldo Moro in 1978, the attack by the Japanese Red Army at Lod airport in Israel in 1972 — and so on, back to concerns about the Bolsheviks in the 1920s. None of this concern is unwarranted, but we should beware of alarmism and unrealis-

In fact, the more grave the terrorist threat, the more certain it is that it will be suppressed before it causes scrious disruption, threatening the state or the public order. Today the Red Brigades are impotent, the Bader-Meinhoff gang in West Germany has been suppressed and the Japanese Red Army is hardly existent. The extensive terrorist actions in the 1960s by the Montoneros in Argentina and the Tupamaros in Uruguay were brutally but effectively suppressed by the military of those countries. India's crackdown on the Sikhs is the latest demonstration of a state's ability to crush such a threat to its authority.

Besides, in most cases the drama of terrorism grossly exaggerates its real effect. Irish Republican Army terrorism has made essentially no progress against British rule in Northern Ireland. Che Guevara's romanticism brought concern over possible mass insurgency in Latin America but little change in its political or social systems. Certainly the Symbionese Liberation Army and the Weathermen had little effect upon the ordinary citizen's life in the United States, compared

By William E. Colby

to many social problems that Americans tolerate with equanimity—such as the 23,000 Americans who die each year from misuse of handguns, or the 25,000 killed by drunken drivers.

What exactly is terrorism? It is a tactic of

indiscriminate violence used against innocent bystanders for political effect. It must be distinguished from the selective use of violence against

Success can be achieved only if the public supports the effort.

the symbols and institutions of a contested pow-er, which is unfortunately a norm of internation-al life. The difference is critically important. Without it there is no way to distinguish "your" terrorist from "my" freedom lighter, or

aid to terrorists from covert support of friendly forces like the Nicaraguan contras, or counter-revolutionary fighters. Aid to friendly guerrilla ghans today, is a regular part of the international contest, whereas the indiscriminate use of violence can be denounced on a solid moral basis. We probably cannot eliminate terrorism, hut

we can take steps to contain it. Intelligence is the first arm of defense against the terrorist, identifying him, his cause and his supporters. Such intelligence can provide tips about general plans or specific tactics that can lead to the frustration or capture of the terrorist. Along with the careful accumulation and collation of data, it may often include exchanging information with friendly nations and occasionally launching risky and difficult missions to

infiltrate terrorist groups.

This requires resources. It also requires that the intelligence services not be hamstrung in their operations by great public exposure or excessive legalistic restraints. The innocent citizen must he protected from excessive governmental intrusion, but legislative and judicial su-pervision can provide reasonable protection. The second major step to protect against ter-

rorists involves security practices that make their task more difficult. The barriers around public buildings, the electronic screening of crowds, irregular schedules for multinational executives and effective police work can all be carried out with minimum inconvenience to the public but maximum deterrence against the terrorist.

But finally—and this may be the most impor-tant rule for any government hoping to protect itself and its citizens from terrorists—success can be achieved only if the public supports the effort. The difference between a public that re-ports evidence of terrorists to the authorities and one giving covert support can mean the entire difference between success and failure.

In this, international public opinion can be enormously important. The international rejection of the South American factic of "disappearances" severely weakened the governments practicing it. Death squads in Central America have made it difficult for foreign friends to support the governments in some of those nations.

The best way to ensure public support is to insist that the rule of law be fully applied in the light expiret the temperature.

fight against the terrorists. The French use of torture in Algeria in the 1950s was widely repudiated by French public opinion, greatly under-Why is the rule of law so important? The most

successful tactic against the guerrilla or terrorist is to recruit him, not shoot him. To do that he must be confident that he will benefit from any amnesty that is offered, and will be subjected only to a coherent rule of law. The terrorist also must be turned from his

belief that violence can advance n cause valuable to his compatriots by a demonstration that a better result lies in the programs and policies of a government determined to ameliorate the lot of its people and to treat even its enemies with justice, even if this must be stern in some cases. If terrorism is the indiscriminate use of force

against innocent bystanders, a government re-sisting terrorism must be discriminate in its own use of lorce to ensure the safety of its bystanders.

Two Ideas to Help Sharpen Economic Forecasting

By Charles Wolf Jr.

SANTA MONICA, California — How reliable are the predictions about future budget and trade deficits, higher interest rates, economic "overheating" and resumed inflation that we read about every day? Not very. Consider n few examples:

• At the start of 1983, both sup-

ply-side and Keynesian models pre-dicted modest economic growth for the year. The Council of Economic Advisers' initial growth forecast for 1983 was between 1.5 and 2 percent; the forecasts of the Congressional Budget Office, Data Resources, Wharton, Chase and a number of others were half again larger. The actual 1983 rate was above 6 percent, more than double the consensus of the principal forecasters.

In July 1983, after three quarters of the fiscal year had elapsed, the Reagan administration's forecast of the expected budget deficit for fiscal 1983 was \$212 billion; three months er the actual deficit turned out to be \$195 billion. For the current fiscal year the administration forecasts a deficit of \$178 billion. But, according to estimates by private forecasters, the deficit is likely to be about \$160

billion — at least 10 percent less. • In March, the Department of Commerce's "flash" estimate of the first quarter's real growth rate for GNP was 7.2 percent, but the actual rate has turned out to be 9.3 percent a 29-percent error.

Such examples could be multiplied many times. But even small forecasting errors can have large effects. Consider the stock market's violent reactions to forecasts of higher interest Forecasters err out of ignorance, mostly about macroeconomics (the economy as n whole), what they know most about is microeconomics (the determination of prices).

What should we do about forecasting? The answer is a combination of common sense and piety.

by both government and business forecasters, by academics and re-

search firms, by Republicans and Democrats. While economists talk

The common sense is that economic forecasts should be taken with plenty of seasoning: not ignored, but certainly not taken too seriously; and the more distant the forecast, the less seriously it should be taken. The picty is that the forecasts should be improved, mainly by replacing macroeconomic ignorance with macro-economic knowledge. This is bound to be a slow and difficult process, but

made easily and quickly.

The first would be to present forecasts as ranges (together with an indication of the uncertainty applying to different parts of the range) rather than as point estimates. It is absurd for the Treasury to forecast, as it has, a 1984 federal budget deficit of exactly \$177.78 billion. Economic forecasts should convey at least as much information about the true uncertainty of the estimates as is conveyed

in standard weather predictions. For example, "overcast and cooler with a 40 percent chance of showers" suggests a formula of this sort: "GNP growth rate of 5 percent, with n 50 percent chance that the rate will be 2

not partisanship. Errors are made by supply-siders as well as Keynesians, with current computerized macroecowith current computerized macroeconomic models. Forecasts are rarely presented this way because modeler are reluctant to admit the uncertainty surrounding their forecasts. Users of the forecasts should insist that this reluctance be overcome. A second improvement would be

to keep a "batting average" for each of the principal forecasters, as a regular and continuing record. Scoring could be based on annual forecasts of several key indicators: GNP growth, inflation and the budget deficit, among others. One point could be assigned to each forecast that is no more than 5 percent from the actual

tions depending on how far the fore-cast is from the mark. The score would be kept by government agen-cies, hy research firms or by the news media — but not by the forecasters.

A scorecard would help to inform the unwary public about the best and the worst, as well as about how bad even the best are. It would also tend, over time, to improve forecasting. The market would assure that the better forecasters survive and the others look for another line of work.

The writer heads the Rand Carporation's research program in internation-al economics and is dean of Rand's graduate school. He contributed this comment to The New York Times.

reopening the issue of territorial com-promise and settlements. Despite the vigor of Israel's democracy, its soci-ety has got itself into a paralyzing impasse to avoid urgent questions.

For a long time basic issues have been pushed aside on grounds that the Arabs are not ready for a serious attempt at accord. So, the argument went, why should Israelis divide themselves over hypotheses? Yasser Arafnt made clear again on Tuesday, in an appearance in Geneva, that the Palestine Liberation Organization still is not about to recognize Israel. still is not about to recognize Israel.
But it is becoming evident that the
waiting game has had the same effect
on Israel as it has had on the Arabs,

By Flora Lewis

PARIS — The televised debate Tuesday between Prime Minister Yitzhak Shamir and his challenger,

Shimon Peres, was reportedly ho-

hum. The campaign for the July 23 elections is coming to an end without directly addressing Israel's most severe and immediate problems.

These are inflation, now 400 per-cent, and the search for peace. Ap-parently they are just too painful for the politicians to face with candor.

Dealing with inflation inevitably

means an austerity program that will hart terribly. Seeking peace means reopening the issue of territorial com-

increasing internal division and making it harder to cope with fundamentals of national purpose.

Concluding a five-year assignment to Jerusalem, David Shipler of The New York Times wrote n perceptive summary (1HT, July 11) of where the country has arrived after its 36th birthday. It cannot resolve the underlying question of what kind of society it wants to be, Mr. Shipker Iound — "religious or secular, nationalistic or

humanistic, Western or Middle East-

ern, absolutist or pluralistic." He seggests that this may be unresolvable If so, it is a sorry contrast to the clear-minded determination of the state's Zionist founders, and may well be a greater danger to its flourishing survival than is Arah comity. Above all, Israel is an idea: not a historical relic or accident but a cre-ation of human decision. If Israel loses its sense of why it exists, it will lose its capacity to thrive, There were always quarrels among

Zionists. The most poignant moral issue for Israelis now is Jewish terrorism. It isn't as new as it seems

The state came into being through war, an underground army and immi-gration made illegal by the British mandate. Menachem Begin's Irgun Zvai Leumi and the Stern Gang used terrorist tactics that David Ben-Gurion, who became the first prime minister, opposed to the point of a shoot-out to bar a shipment of arms to Mr. Begin, Ben-Gurion felt then and inter that terrorism was a bad heritage.

But there was an exultant sense of common values and common destiny in the early days, a humanistic vision of a modern nation that would rejuvenate the spirit of an ancient people bent with suffering. It vibrates through the biography of Jerusalem's Mayor Teddy Kollek, written by his son. Mr. Kollek, who was an aide to Ben-Gurion, brings back to life the high hopes and the miraculous energy that the vision inspired.

Now, as Mr. Shipler's report showed, Israel's mood is "confused corrosive," fearsome of pulling itself apart in a bitter conflict of its aspirations. He quotes Rabbi David Hartman as saying: "This country re-quires a totally new channeling for its romantic passion. We're not here to reclaim the land. We're here to reclaim Judaism. What's at stake is

the soul of a people."

Whether acknowledged or not, the underlying issue of the election is whether Israel is going to try to regain is moral assurance and vitality by facing its real problems, or allow its arteries and its heart to harden.

King Hussein of Jordan told the visiting French president, François Mitterrand, this week: "We are rapidly approaching a moment of total despair for peace in the region. The risk is letting the last chance go by." That is an Arab view, but for different reasons it may be just as true of Israel. Arab impotence and Arab frustration stem from the inability to coalesce, modernize and infuse sick old societies with healthy energy. Is-rael risks sliding into a similar Mid-dle Eastern pit if it allows its meaning

for holding and wielding power, in the region or within the nation.

American sympathizers of Likud and its obsession with force and territory should weigh the stakes in the longer term. Many more years of in-transigent refusal to make the effort for a renewed moral consensus may leave Israel unable to make the effort for peace. Religious fanaticism is gaining among both Arabs and Jews, and fanatics can't talk.

to be narrowed into the sheer struggle

That does not mean that Mr. Peres and a Labor-led government would assure a better, more rewarding course. But at least there is a chance. The Israeli voters' choice is vital.

The New York Times.

LETTERS TO THE EDITOR

Discerning the Terrorist Regarding "A Sharper Definition of "Terrorism" Is Needed" (July 2) by Charles Maechling Jr:

Violence can only enjoy the politi-cal offense privilege if it is the "ulti-ma ratio," the last resort, with the burden of proof on the offender that other, peaceful means have failed. Thus the PLO or the IRA, which

could have used diplomatic or parliamentary means but have resorted to violence, are terrorist organizations. The Nicaraguan contras, or the Italian and French resistance fighters in World War II, have had no other means to fight tyranny but by force. Hence their acts must enjoy political privilege, and they are not terrorists.

It is therefore easily determined who is a terrorist, and who aids or abets a terrorist. Whether the final determination should be left to the discretion of the executive or the judicial branch is highly controversial. The U.S. administration's proposed legislation on terrorism tends to view it as political and imposes the deci-

Drought in Kenya Frays Government's Nerves

By Alan Cowell New York Times Service

NAIROBI — The clouds at dawn are gray and heavy and peo-ple say, without conviction, "Perhaps it will rain." Then, as the morning unfolds, the sun burns off the clouds and the frail hopes that had come with them, until, hy nnon, the grayness has gone.

In Kenya, a one-time model of African development, and the United States's main regional cli-ent, the year has two benchmarks - the short rains, from October to November, and the long rains, a deluge from March through May.

This year, the long rains did not come and the skies have remained

N.Y. Stocks Fall to 4-Week Low

NEW YORK — Prices on the New York Stock Exchange fell to a four-week low Thursday when three rally attempts faltered on Wall Street's reluctance to invest in a climate of high interest rates.

"People are focusing on earnings potential and there is no room for disappointment," said William Dailey of Montgomery Securities, San Francisco, referring to ITT's surprise divideod cut. "ITT showed you all you need to know about that on Wednesday." about that on Wednesday.

High-technology stocks came under attack following a DataQuest Inc. survey that showed orders for electronic connectors and semiconductors have declined. But takeover issues man-

aged to attracted some attention.

The Dow Jones industrial average lost 3.98 to 1,104.57, the lowest level since it finished at its 1984 low of 1,086.90 on June 15. It plunged 18.33 Wednesday, the worst loss since it fell 23.87 or Each 29. 22.8Z on Feb. 28.

Declines topped advances 944-495 among the 1,948 issues traded. Volume totaled 86 million shares, down from 89.5 million traded Wednes-

The slower pace indicated many megabuck investors stayed on the sidelines to await the Federal Reserve's post-marker report that showed that M-I, the narrowest measure of the U.S. money supply, fell \$1.6 billion in the latest statistical period. That left it just below the Federal Reserve's target for the first six months

Of the broader money measures, M-2 rose \$13.7 billion in June and M-3 was up \$20.3

Trading also was restrained by investors waiting for the government's report Friday on June producer prices, retail sales and industrial production to get a clearer picture of the course

of the economy.

The bond market rose in response to the money supply figures. Also, federal funds rates

banks charge overnight dropped to 10 13/16 percent from 11½ percent Wednesday.

"A few institutions did some cautious bargain hunting, but basically people are holding onto their money," said Keith Hertell of Drexel Burnham Lambert. "They want to see what the Fed's Open Market Committee does next week about tightening credit."

Several dealers said rally attempts were

blunted by a large institutional selling program.

ITT was the most active NYSE-listed issue
Thursday, up 1% to 23. The stock plunged 9% Wednesday after ITT announced it was slash-

ing its dividend and projected lower earnings.
General Electric, down 1½ Wednesday, was second, off % to 49%. GE had second-quarter carnings of \$1.28 a share, up from \$1.15 a year

AT&T, which sbed 'a Wednesday, was third, unchanged at 17%. AT&T froze the salary structure of 14,000 management-level employees. IBM, which is slated to report carnings next week, fell is to 104%. Among the high-technology issues, Texas In-struments skidded 3% to 119, National Semi-conductor is to 11%, Advanced Micro Devices 1

o 291/4 and Motorola 2 to 311/8.

ARA Services climbed 5¹⁴ to 54¹⁵. Former ARA executive William M. Siegel and others have proposed a \$60-a-share buyout,

PICASSO & PROFITS

On August 9th, 1982, BARRON'S mused.... "The market seems to be saying it's seen the future and it doesn't work". Their gloom was shared by the N.Y. TIMES which commented on August 15th; that "The bottom has not been reached, steel-willed optimists may be about to throw in their towels". At the time BARRON'S and TIMES were exhaling passimistic projections our researchers remained resolute, advising readers, to "buy into weakness" predicting (while the DOW was under 800) THAT THE DJI WILL TOUCH 1,000 BEFORE HITTING 750".

Looking back can be as useless as having Picasso paint Easter eggs; the past is prolgue, the epilogue has yet to be written. The dynamism of Shakespeare's Prospero will catapult the DOW beyond 1500. People with his philosophy caress potentiality and purpose, value and meaning; power

his philosophy caress potentiality and purpose, value and meaning; power, intelligently utilized for the private and public good.

Since late 1981, C.G.R. has made 273 "buy" recommendations; all but 14 subsequently advanced. As contrarians, we also focused upon "short sales"; bloated equities that were mesmerizing the "Street". Approximately 92% of the "shorts" ultimately sagged, among them APPLE COMPUTER, which we categorized as a "LEMON" at \$ 56, or COMMODORE, which C.G.R. "attacked" at \$ 60. Current quotes? APPLE \$ 27, COMMODORE \$ 28. Our forthcoming letter probes the mood of the market, highlighting shares that may be gobbled up by predators, as was PETROLANE (\$ 20) which C.G.R. selected as a "choice morsel" for a take-over a few months at the \$ 12 level. In addition, our analysts review incubating corporations which offer the duality of low-risk and anthemetically progressing earnings; emulating other once "anonymous" special situations that escalated more

Japan Planning to Enter Satellite-Launching Field

Revies

TOKYO — Japan plans to enter the satellite-launching market by building a rocket with its own technology, a Science and Technology Agency official said Thursday.

He said agency's space development council will develop the H-2 rocket capable of launching two-ton satellites into orbit 36,000 kilometers (22,300 miles) above earth.

Japan's determination to build the rocket without relying on U.S. technology is a cantral part of the plan, he said.

Glyndebourne's 50 Years of Opera in a Stately Home

by R. W. Apple Jr.

LYNDEBOURNE, England - John Christie was an eccentric, strong-willed millionaire landowner, a former science master at Eton, who married Audrey Mildmay, a soprano who had sung with the Carl Rosa opera company. the rather tattered troupe then struggling to keep the operatic flame burning in England. They lived at Glyndebourne, a manor house tucked mto a particularly verdant fold of the Sussex Downs, a few miles from the Channel. In the twilight of empire, the grand aristocratic flourish was still alive and well in the land, and John Christie decided to add a little opera house to his country seat so

Audrey could sing there.

Almost by chance, be was able to secure as his music director the German conductor Fritz Busch, who had been music director of the Staatsoper in Dresden, who had left his homeland because of the rise of Hitler and who took the job, he later confessed, because he thought the first season at Glyndebourne would also be the last. (His brother, Adolf, the violinist, emigrated to the United States and along with his son-in-law, Rudolf Serkin, the Mariboro School of Music.) With Busch came Carl Ebert, as producer, a German actor and stage director and a protege of Max Reinhardt, and Rudolf Bing, a Vienna-born concert and artists' manager who had worked with Ebert in Berlin, and whose journey would take him to the Edinburgh Festival, as artistic director, and the Metropolitan Opera in New York.

That was in 1934, and the fledgling troupe — the Glyndebourne Festival Opera — produced two operas by Mozart, "Le Nozze di Figaro" and "Cost Fan Tutte." In many ways, they represented a revolution. They were sung in Italian, in a day when they were still being sung in German in Vienna and in English in London; they were full of minutely studied musical and dramatic detail, the result of painstaking rehearsal; and they made a point of carefully integrated ensemble singing rather than focusing exclusively on the stars (among wbom was Miss Mildmay).

"Of course," the eminent philosopher Sir Isaiah Berlin wrote in a reminiscent essay recently. "Munich, Vienna, Covent Garden have served Mozart nohly, and above all Salzburg, then and now. But I wish to testify that for me, and I believe I speak for a good many of us in this country, the idea of what an opera by Mozart is and can be, was altered — indeed, transformed — hy Glyndebourne and it

Fifty years have passed, a global war has been fought and standards of operatic production have risen everywhere. But Glyn-

John Christie, the festival's founder.

debourne remains (dare one say it?) unique. This summer "Figaro" and "Cost." Glyndebourne's all-time favorites, are once again on stage in Sussex, the ideal of an integrated company survives untarnisbed, and the Christie family remains, still living in the hig house and still in charge of the festival, in the person of John and Audrey's son George, who is also 50 this year and whom Queen Elizabeth II recently knighted in homage to Glyndebourne's half-century.

There is much more to Glyndebourne than the productions themselves (and the cynics like to say that most of the wealthy patrons who go there are not really all that interested in Mozart and Rossini). Bernard Levin, the critic, calls the place "the enchanted garden." Above all, there is the sense of timeless occasion — the afternoon trip down from London on the train or by car, men in dinner jackets and women in long dresses at lunchtime, the pre-curtain Pimm's in the walled gardens adjacent to the theater, and especially the picnics in the broader lakeside gardens during the 75minute intermission. Carrying wicker hampers, folding chairs and tables, wine coolers and all the other paraphernalia of the quintessentially English picnic, the operagoers eat their dinner while black-and-white cows watch from the pastures around them. I have seen silver candelabra on some of those tables, and whole partridges and sides of beef, and England being England, I have seen people trying to eat with a fork in one hand and an umbrella in the other. One night even saw a woman in a chiffon evening gown and rubber boots.

B ut just as the tennis is good at Wimbledon and the racing good at Ascot, two other social fixtures of the English summer, the opera is good at Glyndebourne, and the people in charge are never hilled into thinking that they are staging a garden party. The people in charge, in addition to Sir George, are the Dutch conductor Bernard Haitink, the musical director; Sir Peter Hall of the National Theater, the artistic director, and Brian Dickie, the general administrator.

Hall is responsible, as it happens, for four of the five productions on view in Sussex this summer, rather more than usual. They are Figaro," in a production first seen in 1973; "L'Incoronazione di Poppea," by Monteverdi, new this year; "Cosl," first seen in 1978, and Benjamin Britten's "Midsummer Night's Dream," first seen in 1981. The fifth opera, also new this year, is Richard Strauss' "Arabella," staged by John Cox.

"The thing that makes Glyndebourne different," Hall said in a recent interview, "is that they give you time. People here care very much, they try hard, like amateurs in the old sense of the word. We rehearse for weeks, not days, and anyone who wants to sing here must stay here — none of this jetting in and out that so destroys productions in many houses. We don't do instant opera."

Although the pay is very low (Hall estimates that a singer earns a tenth as much at Glyndebourne as for a similar engagement at Salzburg, for example), the tradition of careful preparation, as well as the ambience of the place, the interweously of professional and personal lives in a hucolic setting, lures good voices here. Many use their stay to learn new roles that they will sing later in major capitals. An example is Maria Ewing, the Detroit-born soprano who is Hall's third wife; she will sing Carmen here next summer before doing the role at the Met. Ewing, who is singing Poppea here this year, said she found the atmosphere at Glyndebourne ideal — "serious but never heavy, relaxed but never casual, even if it seems so."

Glyndebourne began with Mozart and has stayed with him. But over the years it has added Strauss, Rossini (especially under Vittorio Gui, who succeeded Busch) and others; it broke new ground with a series of Baroque operas by Monteverdi and Cavalli, a series brought to a climax this year with "Poppea," all conducted by Raymond Leppard. Hall now plans to move on to Verdi, a composer more associated with the grandeur of huge stages than with the intimacy of Glyndebourne. He argues that the Italian's early and middle works were in fact written for theaters about the size of the one here, which seats 830, and says he hopes to "strip away some of the usual

grandiloquence while maintaining the genuinely heroic qualities." ny of his predecessors, he speaks feelingly of the pos ties available to a director when the audience can "see the eyes of the actors" and thus relate directly to the emotions that they portray.

Ever since it began, Glyndebourne has had a reputation for discovering young singers. Among those who sang here early in their careers, before they gained international renown, were Elizabeth Söderström, Luciano Pavarotti, Birgit Nilsson, Joan Sntherland, Mirella Frem, Ileana Cotrubas and Janet Baker. Baker started in the chorus. The tradition continues, as it must, for the festival cannot afford to pay the prices demanded by the international superstars (although some still return, such as Söderström and Frederica von Stade and, in 1987, Lucia Popp).

Of late, it has looked to the United States for much of its talent because, as Brian Dickie commented. "It is a tremendously fertile bunting ground, with good young singers in great profusion, far better trained than most of those one hears in France or even in

Intermission, outside the theater at Glyndebourne.

Italy." This summer, three of the six singers in "Cost" are American — J. Patrick Raftery, Carol Vaness and Delores Ziegler — and every opera has at least one. Dickie wonders whether "our Anglo-Ameri-

can axis may be getting too strong."

"On our very best night," the administrator said, "you will hear performances on a par with the best in the world. Most nights, we fall a little hit short. But our average, I think, is very, very high."

A extension of one man's wallet. John Christie personally met the entire prewar deficit of about £100,000 - £140,000 at the current exchange rate hut vastly more then. Today, every performance is sold out and there is oo deficit, even though Glyndebourne is the only opera house in Europe that gets not a penny in government subsidies. It meets 92 percent of its costs from the box office and other direct sources, including the bars. The other 8 percent comes from corporate sponsorship and gifts. On the whole, says Dickie, "We are bappy to depend upon our own success, because it means we can do things on our own terms, at our own pace, without having to put up with people who deign to give us two days of rehearsal time."

But it also means that ticket costs are high; an orchestra seat costs £38 (about \$55), which in British terms is a great deal of money.

Glyndebourne is often attacked as the province of an elite, which it most surely is. Almost 85 percent of the tickets go to the 5,000

individual members and 250 corporate members of the Festival Society - there is an endless waiting list for memberships - and that means there are only about 125 for the general public for each

Sir George Christie recognizes that the character of his audiences explains his lack of subsidy from the Arts Council, the agency that distributes government subsidies. He says he would welcome Arts Council money if he could get it, but adds: "They would make me the rich to come here, and if I lowered my ticket prices that would roh us of as much revenue as I would gain from the government grant." As long as the economic hase of this country holds up, he said with confidence, "There is no reason whatever for Glyndebourne failing to continue indefinitely on the same basis as we operate

Why has Glyndebourne never been duplicated elsewhere? "I haven't the vaguest idea," replied Christie, a self-effacing man whom every member of the company calls by his first name, "But I do think you need a family, because that keeps it from becoming too institutional." The lack of the heavy institutional band is nicely symbolized here in Sussex by the fact that there are no trash hins in the gardens: the picnickers take away every cork, every hit of aluminum foil, when they pack up to return to the opera house after the intermission. © 1984 The New York Times

The Last Speaker Of a Rich Language

by John-Thor Dahlburg

ANDIRMA, Turkey — Only one person now stands between the Oubykh language and oblivion. When Tevfik Esenc, now 82, disappears, linguists say that what is currently the world's rarest living language will become a

A century and a half ago, the tongue belonging to the Caucasian group of languages was spoken by as many as 50,000 Oubykh tribesmen in the Caucasus valleys east of the Black Sea. Now a frail farmer in Turkey is the last known speaker, and language scientists have beat a path to Esenc's hamlet in Asia Minor to record his every

"Because Oubykh today is just one man and he will one day disappear, all of this fuss may appear trivial, even useless," said Georges Dumezil, a member of the Académie Française, who has studied Oubykh and other Caucasian languages for more than 50 years, "But from a scientific point of view, each and every language has great impor-

word.

Panning la

e-Laure-hine

ig- 27

-----Marks See

For scholars and researchers like Dumezil, Oubykh's fascination lies in its extreme variery of sounds, or phonemes. English has about 30 different phonemes, compared with more than 80 for Oubykh, including four different pronunciations of the twinned let-

There are 82 consonants, but only three vowels. Transcribers have had to use both Latin and Greek letters, plus some signs of their own invention, to capture the wealth of

"Oubykh is doubly interesting, first be-cause only one person still speaks it, and second because there is that huge number of phonemes," said Dr. Luc Bouquiaux, deputy director of the Paris-based Laboratory for Languages and Civilizations of Oral Tradi-

It was the French center's 40 researchers who identified Oubykh as the world's rarest language - "unquestionably the rarest because there is only one man who can speak it." Bouquiaux said. It is also "among the richest, if not the richest, language we know in terms of the sounds you have to make to

speak it," he added. Oubvish's decline started with the exodus of the Moslem herders and farmers from czarist Russin in 1864, after the Crimean War, and their resettlement in Ottoman Turkey near the Sea of Marmara.

There, the need to speak Turkish to be understood, as well as competition from offer Caucasian languages, made a knowledge of Oubykh useless. Today only Esenc has complete mastery of the tongue, though four or five other tribal elders still remember some phrases.

"No one is really responsible for the death of our mother tongue," said Esenc in a recent interview, speaking Turkish through an interpreter. "It happened because of our pov-erry, and our being dispersed several times by the Russian czars and the Turks."

To preserve as many scraps of the dying language as possible, linguists have flown Esenc to Oslo and to Paris, where he has been four times. Other researchers have trooped over rutted tracks to the farm village of Haci Osman where the last of the Oubykh speakers lives in a but with a pounded dirt

"The younger people there don't understand why anybody would waste his time learning the language," said Dumezil, who spent 20 summers in Turkey compiling a grammar and dictionary and transcribing Oubykh folk tales. "They told me: "You'd be spending your time better hy learning English."

When Esenc dies, Dumézil admitted, "much will be lost. But much has already been saved, and unlike ancient Greek or Latin, we have Oubykh speakers'recorded on

There is no chance, scholars and native speakers agree, of resurrecting Oubykh as a living language.

"Turkish authorities aren't interested, and our own young don't want to learn it," Esenc said. His three sons are incapable of carrying on a conversation in their father's tongue and must speak Turkish.

Scholars praise the cooperation of Esence and other villagers in helping them pierce the mysteries of the dying language before it is too late. Tevfik immediately understood the importance of helping us," said Dumezil, who has thousands of Ouhykh words inscribed on file cards awaiting incorporation into a French-Oubykh dictionary.

Esenc hopes to die in the hilly village of Haci Osman, where he was born. He says he has already written the inscription he wants carved on his tombstone of white marble: "This is the grave of Tevfik Esenc. He was the last person able to speak the language

they called Oubykh." - 1984 The Associated Press

Marathon Man Meets Marathon Cyclists

by Samuel Abt

AINT-GIRONS, France — What was Dustin Hoffman doing in the French village of Langon at 10 o'clock in the morning besides staring intently and somewhat incredulously as a drum-and-bagpipe band accompanied eight Spanish Basque dancers rattling a wooden platform with their stomps while a cowboy marching band from near Pocatello, Idahn and a German compah band awaited their turn in the main square?

Like millions of other people this month, Hoffman was waiting for the Tour de France, the world's longest, richest, most prestigious and often tackiest bicycle road

Sometimes this happens hy design, as in the caravan of publicity vehicles that pre-

cede the race by an bour each day. Shrieking the virtues of their chocolates, insecticides, paints, soft drinks, retirement annuities, breakfast foods, furniture sales and first-aid bandages, these advertisers pay more than half the Tour de France's operating hudget.

More of a free will offering is the entertainment provided by some of the small towns through which the race passes, and pauses, as it covers more than 4,000 kilnmeters (2,500 miles) around France for three weeks in July. These frills include free lunches - usually the local sausage, hot or cold - band concerts and folklore festivals

like the one in Langon.

Next year, if all goes according to a plan that has not worked for the last five years. the entertainment will include occasional shooting of a Dustin Hoffman movie, which had something to do with what the actor was dning in the village: gathering atmosphere.

He flew fram New York to France last weekend, joining the Tour de France on Sunday in Bordeaux and traveling with it for Iwn days. With the actor were Michael Ci-minn, the director, and Colin Welland, the

screenwriter.

All three were trying to make up for a lifetime of disinterest in bicycle racing by spending their visit traveling in cars in the mids) of the cyclisis and asking questions. They invariably described their stay as very exciting.
Haffman, Cimino and Welland were

warking on a long-delayed plan to turn the navel "The Yellaw Jersey" by Ralph Hurne into a movie. Published in 1973, it tells of a British cycling veteran, now in his late 30s and retired to coaching, who is lured back to racing to belp his protègé win the Tour de

The protege faiters but by a wonderful

coincidence, the veteran takes the lead when the first four finishers of a daily stage are disqualified for doping. Can the veteran defend the yellow jersey, symbol of leadership in the race? Will his efforts redeem an empty, dissolute life? There is also a love story. Most readers agree that the novel has been justifiably forgotten.

"They say the better the novel, the worse

the film: the warse the novel, the better the film." Hoffman explained hopefully at breakfast in Pau the morning before the race entered the Pyrenees. "We're not literally filming the novel," he continued. "The movie will only be based on it."
Welland, a 50-year-old Englishman wbo

wrote the script for "Chariots of Fire," was similarly defensive. "I can't say I'm im-pressed by the book," be admitted, "hut we won't know what we have until I finish the first draft. He boped to have this done by mid-October.

He seemed undaunted to be making a movie about bicycle racing, a minor sport in a major market, the United States. "There will be a relevance to every other walk of life," he promised. "Even if you make a film about Eskimos, it should say something to

other people."

On a less lofty plane, he told Cimino about one of the few things he knows about cycling. "Did you ever see the poster of 150 naked girls on hicycles?" he asked, referring to an advertisement of a song hy Queen

called "I Ride My Bicycle."

"Get it in the movie," jokingly ordered the director, who made "The Deer Hunter" and "Heaven's Gate." Cimino, 38, said he first began working on the movie in 1975, traveling with the Tour de France that year. These things take time," he explained.

Production was long controlled by Carl Foreman, who died last month. Shooting with the Tour de France was first scheduled in 1980 and has been scheduled again nearly every year since.

Race officials cooperated fully with the moviemakers, since they hope the film will crease a surge of interest for the Tour de France in the United States, a consecration of cycling, as one official put it.

"The first thing I've got to do is get a cycling coach," said Hoffman. "I run around Central Park so I know there are hicycles

At age 47, be is about a decade older than most senior professional riders, but he dismissed this. "The book is about the last moment of your youth, and I think that's the

way I feel now about myself.

"Actors say, 'If I'm going to die, let it be on stage.' This guy says. 'If I'm going to die, let it be let it be while trying to make this curve.' I think I can relate to that."

Restaurants: Musical Chairs in Parisian Kitchens

by Patricia Wells

ARIS — As the story goes, the diner returns faithfully and eagerly to his favorite Paris bistro only to find the chef has been fired, retired or died, and instead of navarin de mouton the restaurant's plat du jour is now couscous. In Paris at least, the game of musical chairs, or musical restaurants, is becoming increasingly popular, and the classic tale takes on more than a bint of reality. These days, it seems, everyone — including thefs from the provinces, the suburbs and out-of-the-way arrondissements — is clamoring for a chance at stardom in central Paris.

Some restaurants even seem to change chefs with the season. Such is the case with Le Marcande, a cozy Right Bank restaurant where the kitchen is now under the direction of the Michelin two-star chef Michel Lorain and his son, Jean-Michel, both of A la Côte Saint-Jacques in Joigny, in northern Burgundy. This is Le Marcande's third chef in as many years, and it's a shame that the management and chefs can't seem to get their act together, for the restaurant is one of the city's prettiest and most appealing outdoor dining spots.

Even the talents of the Lorains don't seem to be able to breathe new life into the ill-fated Le Marcande. We suffered through a recent meal on the cozy terrace as we were attacked by the suffocating aroma of kerosene wafting from the table lamps, went on a wild

goose chase in search of the fava beans in the pigeon and fava bean salad (we found two, count 'em, two fava beans), endured service that was not only amateurish but unacceptably slow, and found it hard to find anything respectable on the rolling dessert cart, which featured numerous cakes showing telitale signs of freezer burn. The bread, at least, is delicious and fresh, and the soft and heavily scented Rhone Valley white Condrieu, the 1983 vintage from the winemaker Marcel Guigal, had the power to turn an unsatisfactory experience into a tolerable one. Unfortunately, it did not. All this for the unconscionable sum of 400 francs (about \$45) a person, more than one is likely to pay for a spectacular meal at the city's finest retaurants, including Taillevent and Jamin.

For an experience that is likely to be less pretentious and rather less pricy, diners might want to try chef Jean-Pierre Vigato's Apicius, just aff Place du Maréchal-Juin in the 17th Arrondissement. In recent years, the chef ran the Grandgousier in the 18th, gaining, then losing a Michelin star in a single year. He seems to have grown from the experience, and by ordering carefully and lightly one should have an enjoyable meal in this simple, pastel dining room where service is fine and professional. Dishes showing promise include a very moist saddle of rabbit served with broad, fresh pappardelle noodles, a fine turbot set on a bed of leeks and onions, and a satisfying apple dessert resembling an old-fashioned bread pudding. But chocolate lovers are likely to feel badly let down by the chef's much-touted grand dessert

au chocolat amer, a blend of chocolat sherbet, ice cream and cakes: A simple Lindt chocolate bar is a lot more satisfying. Cheese lovers will enjoy the beautifully aged and impercably presented selection of Brie de Meaux and Brie de Melun and a lusciously creamy Roquefort. It's just 100 had the accompanying bread isn't better.

Those on the lookout for hard-to-find wines must try the pungent.

dry Savennières, from the Anjou, well priced at 80 francs a bottle. Meanwhile, Remi Pommerai, former chef-proprietor of Chez Gorisse - famed for decades for its fine cuising bourgeoise - has moved to Le Manoir Normand just off Place des Ternes, Here, there's a tiny terrace outdoors, a wood-fired grill indoors, and a very reasonable 100-franc menu featuring satisfying food served in copious portions. Simple dishes that have been given short shrift during the nouvelle wave - such as a perfect frisee oux lardons salad, with crunchy, curly endive and good quality smoked bacon properly sauteed to a crisp — appear right at home here, along with a good grilled steak, a saute of rabbit with fresh pasts and truly superb apple tart, two layers of puff pastry filled with santeed apples and thick creme fraiche. Service is pleasant but slow, and the silver-plated cloche adds a sad, pretentious look to a place that would be a shining homage to old-fashioned simplicity.

New to Paris, though not to Europe, is the latest branch of Cafe Pacifico, a Tex-Mex eatery with places in London, Amsterdam, Mexico and Brazil. Here you'll find crisp corn chips for dipping in a

fine, fresh salsa (it could be much botter); nachos covered with cheese, guacamole and beans; a drab cericle; an honest-to-goodness Caesar salad, and a homey, satisfying chocolate banana bread that makes one realize how many food fads we've all endured during the last 20 years. All in all, a super-casual, friendly place with an umbrella-shaded backyard terrace that makes for an inexpensive vicarious trip south - or just north - of the border.

Le Marcande, 52 Rue de Miromesnil, Paris 8; rel: 265.19.14. Clased Saturday and Sunday, Credit cards: American Express, Diners Club, Visa, From 400 to 450 francs per person, including wine and service. Garden terrace.

China's City of Artful Gardens

by Christopher S. Wren

UZHOU, China — A garden is a garden except in China, where it has been refined into an art form over more than 2,000 years. Western gardens, with their tidy rows of flowers or vegetables, hold little fascination for the Chinese. Grassy lawns are deemed best fit for grazing livestock, and spraying formains disrupt the concept of water as a medium of tranquillity. A Chinese garden employs illusion and discovery to transform available space into a microcosm of the world, not merely as it is but as it should be.

The aesthetics of a Chinese garden rest on four basic ingredients - water, rocks, plants and buildings. The water is placed, mirroring the surrounding scenery. Rocks echo the grandeur of mountains. Trees and flowers add vitality and variety with the inexorable change of seasons. The pavilions themselves offer perspectives from which to contemplate the deeper harmony of the landscape. Embellishments may be added, such as carved bricks, window latticework and calligraphy that enhances the setting with a classical literary allusion.

The earliest Chinese gardens were laid out in the Qin and Han dynasties, running from 221 B.C. to A.D. 220. They matured during the elegant Tang dynasty more than a thousand years ago, as mandarins, scholars and wealthy merchants created oases of beauty and introspection within the walls of their property. For well-bred ladies, crippled by bound feet, the gardens often marked the horizons of their lives.

The finest private gardens were built in Suzhon, a graceful old city with a network of canals and a cultured ambience. It was founded in the sixth century B.C. as the capital of the kingdom of Wu and flourished as a center of trade and scholarship under successive dynasties.

When Marco Polo stopped in Suzhou around 1276, he found "a very noble city and great" with 6,000 stone bridges. A few of the bridges remain in what is now a factory town, along with several Sung and Ming dynasty pagodas. Bul Suzhou is renowned foremost for its gardens, which first appeared 17 centuries ago. Today, fewer than a dozen of them survive.

Suzhou's proximity to Shanghai, 53 miles (85 kilometers) away, has made the gardens a rocks communed firmly with glutinous rice popular destination for tourists. But many tour groups descend with bullhorns and clicking cameras in disregard of the tranquillity the gardens should inspire.

The secret of enjoying the gardens of Suz-hou is to approach them as their owners did, in relative solitude with a mind receptive to every nuance, from the slender stalk of barnboo growing in a corner to the light and shadow playing on a whitewashed wall. Such touches, no less than grander vistas, were intended to stimulate the intellect, evoke a snatch of poetry or justify a cup of wine.

This may mean visiting when the foliage is not at its beight, in spring or autumn. The best gardens lend themselves to every change of season, and are no less lovely when the soft rain has chased the sightseers away. Do not let yourself be hurried through a Chinese garden. The sense of discovery should suffice to encourage you to walk on.

If you are traveling with a tour group, you might pass up breakfast and catch the gardens when they open, or miss a shopping excursion to revisit some view that intrigued you earlier. It is better to absorb a few gardens than to depart having seen them all and comprehended nothing. These then are the finest gardens of Suz-hou, listed arbitrarily in order of prefer-

ence after three separate visits: The Garden of the Master of Fishing Nets Wangshiyuan) is the smallest in Suzhou,

covering less than 1.5 acres (0.6 hectares), yet it is quite possibly the best because its elements are so exquisitely arranged. It is only 10 minutes on fool from the Suzhou Hotel, where most tourists stay.

The garden, reached through a nondescript alley, was built in 1140 by a Sung dynasty official, Shi Zhengshi, to hold his

Surging Wave Pavilion.

many books. Il deteriorated under a succession of owners until 1770, when a Ming dynasty official, Song Zongyuan, restored it and gave il a name more eloquent than the Fisherman's Retreat.

The centerpiece is the main garden, whose

pavilions, halls and corridors surround a large goldfish pond. The panorama changes as you move around the pond. The best vistais found at the hexagonal Arrival of Moon and Breeze pavilion, from which guests enjoyed not only the summer evening breeze but also two moons, one in the sky and the other reflected in the water. Beside the more formal Pavilion of Clean Water, where plays were sometimes performed, is a grotto of and the smallest arched bridge in Suzhou, four steps on each side.

The westernmost courtyard, with its Hall of Staying Spring, was reproduced on a smaller scale three years ago at the Metropolitan Museum of Art in New York. The windows of the hall itself frame actual rocks, flowers and bamboo leaves inside the delicate wooden latticework.

The path out leads past a 200-year-old pomegranate tree, planted in a stone tub, to the 10,000 Volumes Hall. The large exterior doors were opened to let distinguished guests be borne in by sedan chair. The ornate hall itself is furnished with mahogany chairs inset with circles of marble. Next to the final courtyard, which was added in 1949, is a new teahouse where old men, with a pass costing the equivalent of 30 cents a month, come to pass the time sipping, conversing or dozing.

The Surging Wave Pavilion (Langeaug-ting) is Suzhou's oldest surviving garden. It was laid out in 1044 by the Sung dynasty poet Su Zimei on the site of an older house. Unlike most other gardens, it has no water of its own, so it borrows the view of the large pond outside, where fishermen still patiently cast for silver carp. This architectural device of using exterior surroundings to create a sense of more space has been employed less dramatically by some other gardens.

The pavilion, approached by a simple stone bridge over the pond, is known for the

intricately geometrical designs of the latticed windows along its winding cortidors. The Hall for Understanding the Way has gro-tesque furniture fashioned from heavy ban-yan tree roots. The Hall for 500 Virtuous

Portraits of 500 sages, each with a 16-character poem, are etched on the limestone walls, which have been blackened for contrast. The Lingering Garden (Lin Yuan) originated in 1522, but took its name nearly three centuries later from Liu Rongfeng, an official of the Oing dynasty. The next owner, Shan Cunhui, didn't like to hear it called

Men is celebrated for its fine calligraphy.

Shan Canhai, didn't like to hear it called Lin's garden, so he changed the name to another character with the same sound that meant "to linger."

The garden, which covers more than eight acres, was renovated in Qing dynasty style 200 years ago. Some visitors find that its numerous buildings clutter the garden, but 2,100 feet (640 meters) of connecting corridors are convenient for enjoying the views on a rainy day. The windows are called "alive" because each presents a different picture of the garden pond. The central garden, with poplar, gingko and pine trees, changes with the seasons. The roses, peonies and wisteria of spring give way in summer to lorus blossoms. In the autumn, chrysanthe-

mums bloom and the winter brings plum The limestone was hauled from Lake Tai, dozen miles away, where it was immersed for years or even centuries to be sculpted by the currents. The finest garden rocks are slender, ragged from erosion, pierced with holes, yet smooth enough that the rainwater drains. One of the most famous such rocks in China is displayed here behind a lily pond. It stands nearly 20 feet high, weighs five tons and arrived in the dowry of a bride who married into the family. In a smaller garden, a clump of rocks turns into an eagle fighting

a dog if viewed from the proper an The garden's Mandarin Duck Hall was so named to symbolize harmony, because mandarin ducks were thought to be inseparable in pairs. Ironically, this stately hall was divided into separate sections for men and women. The main banquet hall is built from a precious hard wood called namu, once popular for coffins because it does not decay. The silk-screen paintings create the illusion of reflecting the other side of the hall.

The Lingering Garden is a good spot to suse for a cup of tea at a rear nursery where. a dazzling variety of dwarf bonsai trees are cultivated

The Humble Administrator's Garden (Zhuozhen Yuan) is Suzhou's largest, covering about 12 acres. Wang Xianchen, a disgruntled Ming dynasty official, lost out in bureaucratic infighting and retired to build this garden in 1513. Hence, it is sometimes called the Garden of the Unsuccessful Politician. The garden took 16 years to complete and after Wang's death was gambled away by his frivolous son.

A large pond occupies well over half the garden area. It is approached through a conventional-looking park with grass and pine trees. A circular moon gate leads to the pond, which has bridges that zigzag to keep out evil spirits and a bargelike pavilion called Fragrant Isle.

The Lion Forest (Shizilin) was created by a monk. Tian Ru, about 1350 as part of a Buddhist temple, but was later detached as a private garden. It is celebrated for its formations of rocks from Lake Tai, some of which vaguely resemble lions. The rugged rocks form a mountain skyline with miniature peaks bearing such poetic names as Rising Moon and Black Jade.

Other rocks protrude from a large pond to make it look deeper. The Flying Waterfall pavilion, the garden's highest point, sits atop a multilevel limestone grotto. A stone boat on the water's edge is considered a choice place to view the lotuses in bloom. This garden, which includes cypress trees, traditional halls and clover-shaped plum blossom doorways, once belonged to the forebears of the distinguished American architect I.M.

MADRID

Traveling abroad with children obviously tends to limit the time you can spend, or the pleasure you can reap from museum visits. But it also gives you a glimpse of how that culture views children and the kinds of childhood experiences that influenced the country's adults. Nowhere is this more fun than in Spain, a

country in which children often come first. Children are adored, coddled and catered to in a way that makes it less embarrassing when your offspring throws a tantrum in a public place. My 17-month-old baby recentpublic place. My 17-month-old daby recently started screaming with impatience in a restaurant. Embarrassed and trying to bush him, 1 offered him cookies, lollipops and stern warnings, all to no avail. Several people looked at him indulgently and the waiter beamed at him, smiling admiringly and said. "What lungs your boy has! He will be an opera singer.

Restaurants

All this means that you can feel free, along with all the Spanish parents, to take your children with you everywhere, including restaurants for late-night dinners, where you will almost always see many other children. A particular favorite with American children living in Madrid is Foster's Hollywood (Ma-gallanes 1 and Apolonio Morales 3), which serves American-style hamburgers, steak and ice cream sundaes. It is also advisable to eat in one of the many garden restaurants in Madrid, so that the children can play while you dine. One elegant restaurant of this type is Los Porches (Paseo Pintor Rosales 1). A lower-priced informal family restaurant is La Chuleta y el Churrasco on Carretera de la Coruna, slightly outside of the central city area. It can be reached by car or by taxi.

Along many of Madrid's main shopping

streets are caudy shops called Carolina that display an array of penny candy. Children can choose what they want for a few pesetas. Carolina is but one chain. There are also many other similar shops with different

Retiro Park, behind the Prado museum, has lovely walks, boat rides for children and bicycle rentals where for 100 pesetas (about 60 cents) the children can ride around for an hour while their parents sit on a beach and people-watch. There are also cafes and ice cream stands throughout the park, and it's a nice treat for children who have just accompanied their parents to the Prado.

Amusements

In the huge Casa de Campo park there are picnic grounds, boats for rent and a zoo and amusement park. The zoo boasts, as its proudest attraction, the 2-year-old baby panda Chu Lin and his father. On his birthday this year the city gave a birthday party for him, complete with a huge cake, for all the children of Madrid.

The amusement park, called Parque de Atracciones, has a variety of rides, games, restaurants, candy vendors and a photographer with a pony for you to record your visit. If you decide to go out at night without the children, you can usually arrange a baby sitter earlier in the day with the hotel con-

If your child should become ill and you need a doctor's advice, call the British-American hospital (Pasco Juan XXIII, tel: 233-3100 or 233-7405) where several of the resident doctors speak English.

Another attraction for children is a shop on the Gran Via called Sanchez Ruiz Munecas, which has a collection of the prettiest dolls (munecas) in Madrid. Many of the dolls are dressed, made up and given their individual hairstyles in the shop, and the sales personnel will coif them to your specifications. It is fun for children, and many adults, to watch.

Late Hours

Remember that Spaniards dine late. Restaurants don't open for lunch until 2 P.M. or for dinner until 9 P.M. This can be a problem for families with children. But Madrid bas huncheonettes, called cafeterias, that servefood all day. One popular chain is called
California, where a child might stave off
hunger with a hocadillo (cold sandwich
served on a roll) or a sandwich (bot toasted studwich served on white bread). These cafcterias also serve combination plates (called plates combinados) of three or more foods.

Nina Darnton

ROME

To children belonging to a generation we mod on Pac-Man, E.T., and other creatures of their ilk, Rome's more subtle won-ders should be administered in sparing coses. Disneyland it's not.

It makes no sense for parents to force-feed their children on a heavy diet of basilicas. ruins and treasure-laden museums. There are other equally enjoyable ways to experience the city. Its proverbially free-spirited and irreverent populace always has. Romans make the most of their rich legacy rather than keeping a respectful distance. Tourists with kids are advised to do the same.

In a country where the family unit is the bedrock that supports all life, children are welcome practically everywhere. Coddled and pampered, they are the lulians' pride

. In Rome, virtually nothing is off-limits to children. One sees kids everywhere — scampering over the ruins of the Forum, being hoisted up by their parents for a glimpse of the pope in St. Peter's Square or greedily limitation of a greedily ng off a geloto in one of Rome's innu-

merable plazzas. That fualian families themselves find it

quite natural to travel together is demon-strated by their uncanny knack for effort-leasly piling entire generations into what Coun to be ministure cars.

Esting in Italy is a family affair. Not even Pioneer villages and model farms are Canadian specialties.

HIS is the second half of a report by in the poshest of restaurants would a waiter or Italian customer dream of casting a disapproving look toward a restless youngster. In the more rustic trattorie, it's not an uncommon sight for children to put the narrow spaces separating tables to their own imaginative use, while their parents engage in after-dinner conversation.

Rome offers too many edifying sites to be seen in one brief trip. Parents can thus choose from many outdoor attractions more amenable to children's tastes, without feeling shortchanged.

An obvious place to start is the Colosseum, back to back with the Forum. Even without the help of a guidebook, parents can create an evocative mood by spinning a few tales around the crumbling ruins. Between the lively bustle that once characterized the ic and political heart of ancient Rome, the Forum, and the gruesome gladia-torial contests that took place in the Colosseum, is plenty of story material. A trip to the Museum of Roman Civilization, where scenes from everyday life in ancient Rome are recreated by plaster models, (in the EUR district) will help to fill in where the imagination leaves off. .

Piazzas and Villas

Rome is studded with piazzas and public villas, each one a mecca for the city's younger inhabitants. One of Rome's most beautiful squares, Piazza Navona, the site of two great Baroque masterpieces — Borromin's church of Sant'Agnese in Agone and Bernin'a Fountain of Four Rivers — has been in effect converted into a local playground. Sealed off from Rome's ferocious traffic, it is a safe place for children. (The presence of a few unsavory characters in the square doesn't seems to cause any alarm.) Here, foreign parents can do as the Romans do: sit at one of the ontdoor cafes sipping Campari and soda or a cappuccino, with an unobstructed view of their kids playing. Bicycles can be rented for 2,000 lire an bour (about \$1.20) in a small shop next to the Bar Navona. The chocolate-covered mound of ice cream known as tartufo is one of the Piazza Navona's celebrated attractions; attractions especially for kids are two toy stores, strate-gically situated at opposite ends of the square. During summer months, the square is sometimes used as a stage for a traveling circus. Check with the hotel concierge for this year's location.

The most vast of the parks is Villa Borghese (the gallery itself is closed for restoration). It is an immense, rambling garden suited for picnics and leisurely walks. At one end of the park, Pincio hill affords an unforgettable view of the red-tiled rooftops and bulbous cupolas that make up Rome's skyline. Here, children from toddlers to teens, stroll, skate and loiter along the Viale delle Magnolie, an avenue leading to the Pincio named after the magnolia trees that line it.

At one end of another aptly oamed street, Viale dei Bambini, or Children's Lane, (run-ning perpendicular to Viale delle Magnolie), bicycles can be rented for a family tour of the villa grounds. The rental stand can be spotdisrenair, which used to be a shooting tower for hunts on the Borghese estate.

In Piazza Garibaldi, at the top of the

Janiculum, children can find a pony ride and a resident puppeteer.

Practical Matters

Should parents need the assistance of an English-speaking pediatrician or specialist in Rome, the U.S. Embassy has a list available. For emergencies, there is always an official on duty, who can look up the necessary information. Larger hotels generally have a house doctor.

Many hotels in Rome have a list of baby sitters, who, if not actually a part of the hotel staff, at least have proved to be trustworthy. As an alternative, The Economy Book Store in Piazza di Spagna generally has some list-ings of English-speaking baby sitters on their bulletin board.

Karen Wolman

The Japanese, convention has it, love children and, happily, that is one of those stereotypes that turn out to be true. Adults seem to tolerate the most intolerable behavior from

In a park in Kyoto, Japan.

small children, youngsters being spared the need to shape up until they near puberty. It is hard to imagine any people receiving more attention than foreign boys and girls. If they learn no other word in Japanese, they will return home knowing kawaii, which is roughly pronounced kah-why and means cute. It is used all the time. For that reason, children not only tend to like visiting Japan but they also, by their very presence, enable their parents to make contacts with average apanese that otherwise might not occur

That having been said, traveling with chil-dren in Japan is oot always easy. The country is expensive, regardless of age, and even the half-prices for children on trains and in many other facilities do not fully cushico the

Then there's the food. For whatever reason, many Western children regard fish as divine retribution for some form of original sin. Raw fish is more

than they can bear. That can put limits on

the Japanese experience. Yakitori to the Rescue

One solution, yet still retaining a certifi-able Japanese flavor, is to ask the hotel for good yakitori restaurants, where the fare is grilled chicken and vegetables on skewers. Many youngsters and their parents find happiness in the ubiquitous little shops serving neodles, both bot or cold. Tempura, fish and vegetables dipped in a batter and rapidly to children whose only objection is to fish served raw. There are always beef dishes such as sukiyaki and teppanyaki, although prices can be stratospheric.

If chopsticks present a problem, do oot hesitate to ask for a fork; most places have them. And, in the larger cities, no one must do without Western restaurants, including familiar U. S. fast-food chains. These days, they provide a Japanese experience of a kind.

For parents in need of a night to themselves, the big hotels in Tokyo can arrange for baby sitters. Fees vary, but at the main agencies they run quite high — as much as 1,700 yen (about \$7) an hour, and sometimes more for the first two or three hours. Several Tokyo hotels, including the Okura, New Otani and Keio Piaza, have special babysitting rooms where parents can leave their youngsters for a few hours during the day. There are also private agencies. One of the more venerable, with English-speaking sit-ters, is Tokyo Domestic Service Center (tel: 584-4760 or 4769). Hotels can summon physicians but, in a

pinch, the Tokyo Medical and Surgical Clinic near Tokyo Tower (tel: 436-3028) has English-speaking doctors. St. Luke's Hospital near the central market in Tsukiji (tel: 541-5151) also has English-speaking staff

For parents traveling with infants, Tokyo presents no problem for finding disposable dispers, baby food or formula. Supermarkets, pharmacies and department stores usually stock them. Quality is high but, as is often the case in Japan, prices can be, too.

Of course, the big question is what young-

sters like to do. The adveoturous American child will be intrigued by Japan's more exotic lures, but others may find many principal attractions too ethereal or abstract. In brief, too adult. The Kyoto garden that takes an adult's breath away has been known to cause more than one youngster to yawn hard.

Museums and Jungle Gyms

A list of possible alternatives would be too long for this space. But in Tokyo and its environs, usually reliable young sources have had great fun at the Transportation Museum (heavy on old railway cars) and at the pleasant open-air art museum west of the capital in Hakone, which has a delightful jungle gym and a hedge labyrinth to get lost in. Smaller youngsters might enjoy the Children's House in Tokyo's Shibuya section. The Paper Museum in Kita ward provides sedate pleasures. while Korakuen Amusement Park has more raffish entertainment. The roofs of department stores offer all manner of diversion for

For what it's worth, one knowledgeable 12-year-old from Massachusetts says the video game parlors dotting Tokyo have more sophisticated gizmos than those back home. Obviously, that could prove to be an expensive tip. Also not cheap, though nonetheless popular, is the fairly new Disneyland cast of the capital.

Best of all for the truly hardy youngster is the opportunity occasionally to explore Tokyo and other parts of Japan on ooe's own. Neighborhoods away from the main tourist areas are fascinating. The worst that could happen is that one gets lost for a short while. It is, remember, a startlingly safe country.

Clyde Haberman

CANADA

Attiong outstanding Canadian attractions are Stanley Park in Vancouver and the tactile participatory science museum in Toron-to, Upper Canada Village near Morrisburg. There is also Niagara Falls, for neoo-lit wonders that may interest older children.

Many hotels can belp yoo find sitters; most Canadian towns have summer employment programs through which students can be hired to care for children.

In Canada there is national medical insurance so there are virtually no private hospitals. Major city hospitals tend to be firstrate. The telephone directory's Yellow Pages list physicians by neighborhoods and specialty with family practice or children's diseases used as the designations for pediatrie Restaurants

Until my kids were 14 they thought anything they had never seen before was yncky. The trick was to find someplace that served adult food and also served mush. In Canada there are lots of fast-food places and lots of interesting and ethnie restaurants but, like everywhere else in the world, there are virtually no places that can serve a nice chateaubriand for Mom and Dad and a cheeseburger for Junior.

One possible compromise is some of the kicky places that provide mass-produced food along with decor and uninhibited waiters and waitresses. These are restaurants like I. P. Looney's in Ottawa, where waiters dressed like Batman or Robin or the Big Bad Wolf serve and sing. Or, there is Guadalaharry's, where the staff wears Mexican garb

and sings like merry mariachis.

Much more wonderful is an authentie restaurant called L'Artre, outside Quebec city, where a horse-drawn carriage delivers diners from a parking lot to a thatched cottage, where food is prepared at a fireplace according to old recipes, and the staff wear cos-tumes. For the children, the setting and meal is likely to evoke images of the frontier; for me it coojured the image of the eating scene in the movie "Tom Jones."

Michael T. Kaufman

TORONTO

Some people profess not to like Toronto: It is too squeaky clean and the vaunted safety of its streets is only a masquerade for the place's boredom, they say.

Perhaps. For kids and parents this is a

very comfortable town. The public transportation is first-rate, the zoo world-class and Torontonians unabashedly put family values first. From busy Nathan Phillips Square in front of the modernistic City Hall to River-dale Farm — harboring sheep, goats, cows and other farm animals in an inner city park — this city's summer scene is one of smiling parents, energetic kids and a seemingly endless procession of stately prams.

For both residents and visitors, there are several dandy attractions designed with children in mind, but also of interest to grown-ups. A favorite for the under-12 set is Ontario Place, which features an absolutely stupendous playground — replete with doz-ens of suspended sponge punching bags, trampolines and handmade mountains. For the tired and the older, Ontario Place offers a changing program of excellent films shown on a screen six stories high.

For older kids, the Ontario Science Center is a must. Every exhibit can be touched. massaged and learned from. You can play astronaut on a simulated space flight, try your hand at papermaking or be part of a static electricity demonstration. The show is constantly updated.

Another attraction kids like is the CN Tower, a buge needle dominating Toronto's skyline and said to be the tallest free-standing structure in the world. The Metropolitan Toronto Zoo offers both a "zoomobile" excursion and a miniature train ride. Casa Loma, a castle-like house built by an eccen-tric millionaire in 1911 and open for tours, pever fails to excite children's fantasies. From mid-Aogust until Labor Day, the Canadian National Exhibition is a whopping big fair replete with midway, prize bulls and enough cottoo candy to make anybody sick.

Theater

Toronto also boasts an excellent theater geared especially to children, the Young People's Theater at 165 Front Street East. Although productions are geared to young people from about 4 to early adulthood, the quality is really good enough to interest playgoers of all ages. Toronto has several restaurants catering

to kids. One is the Old Spaghetti Factory, 54 The Esplanade, and the Organ Grinder, next door at 58 The Esplanade. The Organ Grinder features a loud pipe organ and percussion instruments; to dine there is proof that you love your children immensely or, perhaps, of something a bit more worrisome.

Douglas Martin

ARGENTINA

Adults who are taking international flights with infants should remember that airlines charge 10 percent of the adult's fare for a child under 2. Most airlines, as a matter of policy and public relations, do give babies meals, but I was once refused by an Argentine Airlines flight attendant who said the infant would get food only if there was some left. Fortunately there was, but she said milk

was only for coffee. The best advice, of course, is to carry your own food, but for those loog flights between South America and other continents that can mean a lot of haby bottles. You may find yourself at the mercy of flight attendants as to whether they want to heat the bottle for you. They do have a device on most planes that does it in a jiffy, but on a large craft such as a 747 it can be in a distant cabin and the attendant is either disinclined or harried.

Here are some hims about traveling with children in Buenos Aires; in a general way the hints apply to all Latin America:

Palermo Park

Children of all ages should go to Palermo Park, particularly around the lake next to the rose garden (in the area of Palermo Park across from the U.S. Embassy). You can rent rowboats or paddleboats to venture out on the lake, take a borse-and-buggy ride around it, or just walk along the many gar-den paths and over trestled bridges. On weekends, when Argentine families turn out-in full force with picnic lunches, you are likely to pass a magician or mime performing an imprompin show for children. Along the way, vendors sell balloons, roasted peanuts and candy as well as colorful lollipops. Have an ice cream or other dessert while sitting on the patio of the Hostal del Ciervo across the street from the lake. It is named after the statue of a deer on a nearby bluff, a traditional site for children to climb and have

Another place to go is Italpark, an amuse-ment park oo Avenida Libertador with humper cars, Ferris wheel and roller coaster. For a not very taxing day trip, join a tour to go to Tigre, a suburban town that is the jumping-off point for boat trips down the many canals of the Parana River delta. The Paraná empties into the Plate River, an estuary, and the area is a favorite weekend resort for boaters and people who own gingerbread summer houses that sit back in the trees along the canals.

For a baby sitter, ask the ama de llaves, the housekeeper, at your lodgings. Hotels usually have a list of reputable baby sitters they will call for you. Prices are the equivalent of \$1 to \$2 an bour.

Emergencies

Almost all hotels have the oame of a doctor or doctors they call in an emergency. Some, such as the Sheraton, have a house doctor who has office hours in the hotel. Hotels that cater to international tourists call doctors who speak English. In a dire emergency, have a taxi go to the nearest hospital, where you are sure to find a doctor who speaks English. Many Argentine doc-tors have studied in the United States or know English in order to keep up with American medical journals. Two hospitals where English is especially common are the British Hospital and the German Hospital. The quality of care at both is above average, though medical care is generally good in many hospitals and private clinics.

Argentines — and all Latins — are very

open and friendly to children in public. Doo't be surprised if perfect strangers come up and pinch the cheeck of your baby. The sourcest taxi driver will stop to let a mother and child cross the street, and waiters are especially forgiving. Children's menus do not exist in Latin America, but restaurants will prepare food in almost any special way you ask them. Children are accepted in almost all but the most exclusive restaurants.

Edward Schumacher

BRAZIL

If for no other reason, having the beach a few yards from most hotels guarantees that children will have a good time in Rio de Janeiro. Wonderful eagle-like kites can be bought and flown on the beach. But younger children should not go to the beach alone because of the large waves and strong undertow in some sections of Copacabana and lpanema. Parents bringing children from the winter in the Northern Hemisphere into the Brazilian summer should also watch out for sunburn in the 90- to 100-degree Fahrenheit

(32 to 38 Centigrade) heat.
For children under 12, the draw of the cable car up the Sugar Loaf is irresistible. In Tivoli Park, on the Rodrigo de Freitas lake, there is an amusement area but there is something infinitely more advecturous about swinging along in a cable car between two granite hills.

Older children who play soccer may espe-cially like to see Brazilian stars at the soccer matches in Maracana Stadium, oot only the world's largest but also the undisputed mecworld's largest but also the undisputed mec-ca of world soccer. The poetic quality of Brazil's version of the game is renowned, but the roar, the flags and the accompanying samba bands of up to 200,000 team support-ers are no less entertaining. Packages including tickets and transportation to and from

Maracana can be bought at most hotels.
Restaurants suitable for children can be found throughout Copacabana and Ipanema, the main resort neighborhoods of the city. Look for pizzerias and churrascarias, the latter selling a great variety of barbeened meat at reasonable prices.

Practical Matters

Baby sitters can be obtained through most hotels in Rio. If a child falls sick, the U.S. Embassy (tel: 292-7117) can give the names of English-speaking doctors. During working hours, ask for the consular section; at night or at weekends, ask for the doty officer. There are also two 24-hour emergency clinics for children with some English-speaking doctors: Urgencias Pediatricas de Copacabana (Rua Barata Ribeiro 111, tel: 542-0448) and Urgil-Ipanema (Barao da Torre 538, tel: 239-3345).

Disposable diapers, bottled baby foods and half a dozen brands of infant formula are readily available in drugstores (known throughout Latin America as farmacias) and in the modern supermarkets in the cities. Supplies may be shorter in small towns and in the countryside, so it is wise to stock up before setting ont.

Most of these products are made by American or other foreign subsidiaries but quality control is less rigid in Brazil. While baby food is reported as about up to par, there are complaints that diapers get co-

34 MAN 35 A

At Foreign Urging, Seoul Alters Copyright Law

By Sam Jameson Los Angeles Times Service SEOUL - More than 70 percen of the music heard on radio and television in South Korea is foreign, and more than 20 percent of the books published here are trans-

lations of foreign works.

Yet the foreign composers and authors are paid relatively little in the way of royalties. They are not protected by copyright in South

Under pressure from other countries - particularly the United States, but also Japan, Britain and France — the South Korean government plans to amend its copyright law for the first time in 27

years.
The demands from the United States came as part of a U.S. effort to get other countries to protect all forms of intellectual property. Io Asia, only Japan now provides full copyright protection for music and

The new Korean legislation will not go far toward satisfying the writers, but it is a step in that direction, according to Lee Jin Hie, the minister of culture and information. Mr. Lee said that full foreign copyright protection would come when South Korea joined international copyright conventions.

He would not predict when that might be, but other officials said the target was 1988, the year Seoul

pic Games.

Copyright law now offers little protection even for Korean composers and writers. Enacted in 1957, when the country had just one radio network, run by the goverament, it excludes broadcasting

from copyright protection.

Khil Ok Yoon, a composer and musician who heads the Korea Music Copyright Association, said that the seven radio and TV networks now operating pay his association only a token contribution, of 20 million won (\$25,000) a year.

Even that small payment, he said, is enough to encourage broadcasters to emphasize foreign music. for which no payments are made. Royalties are paid to foreigners

when records or tapes are imported, not when the music is broad-cast, Mr. Khil said. Much of the foreign music heard on radio and TV is performed by Korean artists. This will not be changed by the new law. In fact, he said, it might even result in more foreign music

being played on the air because it

does not establish a system for col-lecting royalties for foreigners. He said his association was "78 percent to 80 percent satisfied" with the measure, because it provides protection to Korean composers and lyricists in connection with broadcasts of their music. "We will be able to collect royal- government has been deceived by

ties from broadcasting stations," he said. "That is very important to

According to Mr. Khil, the composers' association expects to get about 307 million won a year in royalties when the new law goes into effect in 1986, and even more

than that in future years. In the publishing field, the proposed changes in the law hold little promise for foreign authors. Ac-cording to Kim Kwan Shik of the Ministry of Culture and Information, these authors can protect their work only if they hire a resident of South Korea to obtain a copyright on their behalf.

Not even Korean authors are altogether happy with the proposed changes. They say the changes will do nothing to ensure that publishers reveal accurate figures on book sales and pay full royalties.

According to officials of the Ministry of Culture and Informa-tion, South Korea's 2,000 publishing houses printed about 100 mil-lion copies of 30,000 titles last year. Sales averaged about 2,000 to 3,000 copies per title, and in about 80 percent of the cases, sales failed to cover the costs of printing and dis-

Lee Chang Min. a Seoul National University professor who has es-tablished an association that seeks · to protect copyrights, said that the

ers, he said, routinely concealed

sales figures from authors and tax The existing law requires that the author's seal he affixed to every cupy of a book. But Mr. Lee and

that last year a publishing house, seeking to avoid paying full royalties, forged his scal on copies of a book he had written. The new law, he said, will make

the situation worse because it will

Robot-Mounted Water Jets Give Industry Good Cutter

By JOHN HOLUSHA

New York Times Service

ETROIT — Robots armed with gun-like nozzles at an auto-parts plant in Adrian, Michigan, are trimming and cutting holes in hard plastic shields with one of the most common substances on earth: water. Thin streams under very high pressure are fired from the nozzles and cut through the tough plastic like a knife. Only a little steam and a

buzzing accompany the process.

Although hydranlic equipment has been used to help dig mines for almost a century, high-speed machining with water jets has only been in practical application for a decade.

The robot-mounted water jets at the plant were installed in place of the more commonplace stamping presses used to

remove excess material from the forming process and to punch holes needed to attach the shields to Chevrolet pickup trucks. The shields are meant to protect the trucks' gasoline tanks from highspeed crashes.

Water cuts like a knife when it is pumped at very high pressure

The chief advantage of the robot water-jet system is flexi-bility, according to Kevin Ostby of GMF Robotics Corp., who

helped in its design.
Instead of having different lines for different parts, you can use one line for all the parts," he said. With the programs for different parts loaded in the computer controlling the robots, "retooling" for a different batch simply involves calling up the correct program. And if new parts are designed, all that has to be changed are some handling fixtures and the robots' program.

The frequent sharpening and replacement of cutting edges and punches used in conventional trim and pierce tooling are also adjusted.

Water cuts like a knife when it is pumped at a pressure of

55,000 pounds (24,948 kilograms) per square inch (6.5 square centimeters), about 1,000 times the pressure of a standard city water system, according to Henry Massenburg, president of Flow System Inc., which supplied the system used at Adrian.

"You have a stream that is about five-thousanths of an inch in diameter, or about the thickness of a human hair, traveling at about three times the speed of sound," he said. Water jets can cut rapidly through materials as diverse as corrugated cardboard, plywood, glass and thin slabs of stone. A hollow sapphire is used in the nozzle to form the stream. Because of its hardness, it resists being worn down by the pressure. Pure-water systems are not effective in cutting metal, but by modifying the nozzle and adding a sandpaper-type abrasive to the fluid, even thick blocks of steel

UTTING with water is being used by the aerospace industry to machine new materials, such as graphite-reinforced plastic composites difficult to work with conventional tools. The jets are separating printed circuit boards in the electronics industry and cutting up materials such as fiber-glass insulation and the linings for disposable baby diapers.

Unlike conventional cutting tools, a water jet is sharp in all directions, so that robot arms can move it quickly, without regard to orientation, to cut intricate designs. At the recent demonstration in Detroit, a robot-mounted water jet rapidly cut manshaped figures from a thick stack of cardboard sheets in a demonstration of the capabilities of a combined system.

material; so there is no contact except for the water. Because there is no cutting blade pushing against the material, no heavy clamps are needed to hold sheets in place.

And because the stream is so thin, very little water is used, even in continuous production. Mr. Massenburg said a consumption rate of about five gallons (18.9 liters) an hour is typical, and the four jet cutters at the Adrian plant combined use just 15 gallons

VW Details Strike's **Effects**

Hopes for Payout Are Diminished

By Warren Getler International Herald Tribune

WOLFSBURG, West Germany — The hope that 1984 earnings at Volkswagenwerk would allow a dividend for the first time since 1981 now has to be held with "great skepticism" after VW's loss of 2.8 billion Deutsche marks (\$1 billion) in sales due to the metalworkers' strike, the company's chairman, Carl H. Hahn, said Thursday.

At VW's annual shareholders' meeting, Mr. Hahn said that in addition to sales losses of 160,000 autos, the strike cost the company 500 million DM after taxes. This includes wage payments to man-agement, holiday pay to laid-off workers, and interest and deprecia-tion expenses that continued dur-ing the production shutdown in half of May and all of June.

VW posted a 51-million DM profit in the first quarter of 1984 compared with a 100-million DM loss in the like period last year, and had been setting its sights on achieving a profit this year after two full years of losses. VW, which includes Audi, posted a losses of 300 million DM in 1982 and 215 million DM in 1983.

Mr. Hahn stopped short of say-ing the company would post a loss this year. "If we have suffered a setback, this doesn't mean that we will not achieve our goal of a return

to profitability," he said. He said VW could not expect to make up more than one quarter of the production lost to the strike. He added that results for the first six months would be "markedly set back" as a result.

Mr. Hahn said that because overall production in the first five months was down 45 percent from 1983, the company's share of the West German auto market for the period fell to 27.9 percent from 28.6 a year earlier. Some of this decrease, company officials said, could be attributed to increased market shares for Japanese automakers and for companies with major German operations, like (Continued on Page 15, Col. 6)

Travelers buy air tickets from machines at New York's La Guardia Airport.

Airlines Sell Tickets by Machine; Travel Agents Fear Lost Business

NEW YORK -Ten minutes before the hourly departures of the Eastern Air Lines shuttle to Washington at New York's La Guardia Airport, the last-minute passengers arrive. Like many of them one recent morning, Lou Ulsch of West Milford, New Jersey, sprinted, billfold in month, over to one of the five self-service ticket machines.

He is one of an increasing number of U.S. business travelers who are buying their tickets from machines. It is a trend that disturbs travel

agents who fear the devices could cost them their 10-percent commissions or even their jobs. "It's convenient when it works right," Mr. Ulsch said, as he had to try two machines and two credit cards to get his ticket. Ten seconds later, he was

ticketed and on his way to the gate.
For years, Eastern Air Lines has used ticket machines made by the Cubic Corporation of San Diego, California, for its shuttle flights. But soon a new, more powerful generation of machines will arrive, and not just in airline terminals. Unlike their predecessors, they will offer a multitude of destinations and fares and could take a large chunk of the business travel market.

Made by NCR Corp., the improved machines connect to an airline's mainframe computer and can ticket passengers, check creditworthiness and issue boarding passes. Its software can be customized to accommodate requests for window seats and nonsmoking sections, or even to ask questions

in Spanish.

"People will discover they are more convenient than going to a travel agent or standing in line at a ticket counter," said Dan McKinnon, chairman of the federal Civil Aeronautics Board. "They found it true with banks, and they'll find it true here." The major carriers are placing their orders. Pacific Southwest Airlines, the airline that helped develop the first generation of ticket machines, is ready to introduce the new ones to its customers. Continental Air Lines plans to install 30 within the next month. And American Airlines recently bought 38 of the \$25,000 machines.

For the airlines, the machines can lock travelers into using specific carriers for an entire trip and save on commissions paid to travel agents.

Nevertheless, most industry experts agree the machines will never be able to dispense advice or compare fares, as a good travel agent does. So far, the airlines have placed the machines only in airports for last-minute travelers. But their full-scale introduction in banks, supermarkets and of-fices is expected soon, and it is expected to squeeze the marginal agent.

"That's going to affect travel agents, but not the good ones," Mr. McKinnon said.

Federal legislation sponsored by Representative Glenn Anderson, Democrat of California, and backed by travel agents, will try to overturn the 1982 decision in which the Civil Aeronautics Board gave the machines and other alternative ticket outlets its blessing. But the measure has stalled in both houses of Congress.

Before deregulation of the airline industry in 1978, travel agents were the only ones besides airlines allowed to sell tickets. If the aeronautics board's ruling stands, anyone who gets an airline's consent will be allowed to sell tickets. That includes American Express and Ticketron, two contenders who have the technology and are eager to

Ticketron recently announced it would sell tickets abourd Virgin Atlantic Airlines flights from Newark to London. Passengers can buy tickets at (Continued on Page 15, Col. 5)

Quaker State Set To Buy Insurer

United Press International

OIL CITY, Pennsylvania -Ouaker State Oil Refining Corp., a recent takeover target tif the New York investor, Saul P. Steinberg, Thursday an-nounced it has reached a definitive agreement to acquire a California antomobile insurance concern in a stock transaction

valued at about \$38.4 million. Quaker State, the largest U.S. marketer of antomotive motor oils, said it expects to complete its purchase of First Heritage Corp., based in Agoura Hills, California, in the third quarter

of this year. Quaker State said First Heritage stockholders will receive 2.4 million shares of its capital stock by exchanging one share of First Heritage stock for 0.7144996 share of Quaker State. Quaker State stock currently is selling for around \$16 a share on the New York Stock Exchange, Earlier this year Mr. Steinberg's Reliance Group Holdings Inc. bought an 8.9 percent stake in Quaker State, which was considered an attractive takeover candidate because of its cash-rich position.

Airbus Encouraged by Response

Greece and the Netherlands.

than the current model.

By Axel Krause

ional Herold Tribune PARIS - Airbus Industrie says it is encouraged by recent reactions of major airlines to what probably will be its next project: a four-engine, long-range Airbus known as the TA-11.

Assuming the plane is built by the European consortium, it would carry between 210 and 300 passengers over long, but less-traveled routes, such as Cologne-Boston or Denver-Tokyo, and would compete directly with Boeing's 747 airliner. Its range is expected to be about 6,000 nautical miles (6,900 miles). Alitalia, British Airways, Singaand each plane would sell for about \$60 million.

"We are getting more and more encouraging signs from the airlines about this plane, and our studies

By Lynne Curry

LONDON -- Imperial Group PLC reported a pre-tax profit of £90.7 million (\$121.5 million) for the first half of its fiscal year, 15 percent greater than the £79.1 million of the preceding year.

Despite the increase, the compa-Wednesday.

Analysts said the results of the British tobacco, brewing, food and hotel conglomerate were disap-pointing and below market expectations. The market had anticipated profits ranging from £92 million to £100 million.

In addition, the generally bearish mood contributed in the drop in the share price. The earnings from Imperial Group's tobacco division, its largest profit earner, were not as high as some analysts had anticipated, Imperial Tobacco Ltd. turned in a £55.7-million profit for the six months ending April 30. This was only 2.6 percent greater than the £54.3 million reported for the same period last year.

Analysts said tobacco sales suffered from industry-wide price in-creases in October. This led the trade to stock up ahead of the price rise, so sales slumped in November. the first month of the company's fiscal year.

THE ROARD OF DIRECTORS

HACHETTE

The general stockholders meeting of HACHETTE S.A. met on Wednesday June 27, 1984 under the direction of the president, Monsieur Jean-Luc LAGARDERE, to approve the annual report for 1983.

The result for the parent corporation is a profit of 250,200,000 Francs, including capital gains of 135,100,000 Francs as opposed to 103 million francs in 1982, which included capital gains of 17,600,000 Francs.

It should be noted that the results from 1983 include payment of taxes at the full rate, whereas results from 1982 included significant reported losses.

The consolidated result of the Group, which should be considered as the most significant factor giving the best indication of the health of the enterprise, is 187,200,000 Francs which rose to 329,500,000 Francs after capital gains and losses. In 1982, the consolidated result was 142 million Francs and 265,700,000 Francs after capital gains and losses.

The President made the following comments on the results and perspectives of the Group:

"This progress confirms that the recovery phase of operations, which was our primary abjective, has been successfully completed. I said in my speech last year that the profitable results for 1982 were only one step; we have the demonstration of that today".

The situation calls for two observations

- In our profession, which is so complex and varied, good management is essential. The tools of management must be constantly modernized, and deviations from the budget must be controlled on a daily basis. This is the only way to avoid a possible relapse.
- 2. The health of our balance-sheet notably with an indebtedness that has become minimal allows us to have a capability from now on for making very significant investments - without doubt, and by far the most important of anyone in the domaine of the media in France.

As a result, we will maintain our vigilance tirelessly concerning daily management, and we will not miss any opportunity to develop ourself; first, by an intensified effort of internal creation from which one can hope for much, and then by taking strategic positions in communications sectors which have been carefully selected.

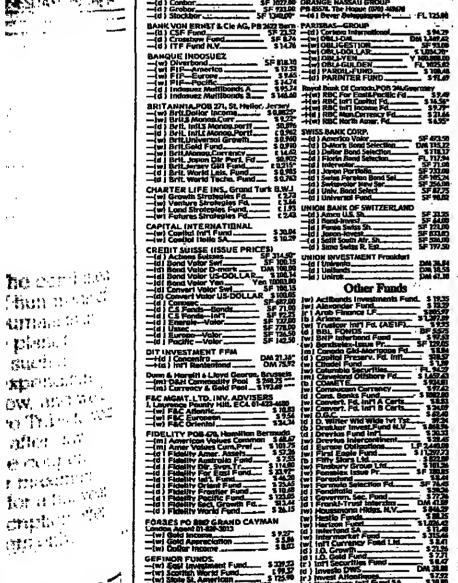

The irresistible development of communications, the manner in which it is produced, the more and more intimate synergy between technology and the creation of "programs" is becoming more and more defined. Its framework is the international world. Its expression is an osmosis between books, newspapers, magazines, audiovisual and computer technology. Technology nurtures culture and marks the progress of human evolution. Faced with the immense perpectives offered by the world of communication, and strengthened by its experience and knowledge, HACHETTE holds a major position with its organization, competence, dynamism, and the quality of its personnel.

HACHETTE is today the leader in the domaine of authentic creation that constitutes book publishing and the press, HA-CHETTE will continue to follow a long tradition of innovation marked by avant-guard initiatives in the fields of schools publications, train-station bookstalls, Livre de Poche (paperbacks)... We will continue to confirm our position as an international publisher by associating with local partners in zones open to French culture such as North America, Hispanic countries, and the Middle East. Publishing remains a considerable market despite the repeatedly announced recession which only touches those who accept death and dot not make the necessary efforts in modernization and investments. Publishing constitutes a natural link with audiovisual media: it is its principle source of creativity and its great reservoir of imagination.

It is true nevertheless that image is the most modern expression of communication and has the advantage of limitless distribution. HACHETTE will voluntarily establish itself in audiovisual media by intensifying its first efforts defined by the strategy of "three screens": (big: movies, small: television, and computer screens). Understandably, the international dimension will be investigated immediately.

Direct public contact seems useful to us at Group HACHETTE in the form of modern sales stores, whose common characteristic is culture and technology. We will develop these stores in France, and then overseas.

How could we not face the future with confidence? HACHETTE is a leader in a field that is in full development. Having found once again its force and health, it will deploy its dynamism in artistic, and cultural creation and in news. It will master the means of distribution and sales, permitting it to shine on the national and international levels.

EXILE. The Unquiet Oblivion of Richard M. Nixon

By Robert Sum Anson, 360 pp. \$17.95. Simon & Schuster, 1230 Ave. of the Americas, New York, N.Y. 10020.

Reviewed by Walter Goodman

I N the decade since Richard Nixon returned to private life, he has never stopped being a public figure. He remains a source of specula-tion and fascination, and it is not at all difficult to understand why Robert Sam Anson, a television and magazine journalist, should have set out to chronicle the former president's course since he departed the White House in 1974.

Relying on other books and articles as well as on interviews with anyone who would talk to him (Nixon would not). Anson covers everything — the attack of ohlebitis, the trips to China, the moves from San Clemente to New York City to Saddle River, New Jersey, the memoirs, the television appearances, the golf and the socializing the self-powered and continuing transformation from discredited politician to elder statesman. Nixon's physical and emotional condition is charted like a television transformation to the state of the weather report. No chapter goes by that we do not hear something about the patient's posture or complexion, his aches or moods.

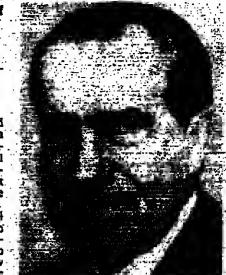

or complexion, his aches or moods.

Mosl of the people Anson contacted preferred not to be quoted, and he appears to have relied heavily on a handful of peripheral figures for most of his original material. For example, William Gulley, who did housekeeping chores around the Nixon White House and the stated on lor a time with the former president stayed on lor a time with the former president, evidently talked a lot. He also wrote a book of his own, however, and did not save any revelations for Anson.

Any reader who comes to "Exile" hoping to learn more about President Gerald R. Ford's pardon of his predecessor, for example, will be disappointed. By this account, although Alex-ander M. Haig Jr. applied pressure to Ford before the presidency was passed on to him, no deal was struck. The worst that Anson suggests about Ford is that he was a soft-hearted guy. But if there had been a deal, would people on Gulley's level have been in on it? And would those who might have been in on it blab to Anson? Similarly, the famous 18 1/2-minute gap in one of Nixon's Watergate tapes remains a

Io a note on his sources and methods, Anson tells of the "extraordinary care" that he look in fact-checking. But he concedes that when he speaks of Nixon "feeling" something, he is relying on what others told him that Nixon was leeling, or, one must assume, what they felt he was feeling. And then there is the dialogue; conversations related in word-for-word detail years after the event are inherently suspect. So despite the commendable care in crediting sources, this is a soft sort of journalism.

The service that Anson performs here is mainly that of anthologist, bringing together the accounts of other chroniclers, who receive due credit. He is fair-minded, not out to vilify or glorify his subject, but any anthology that aspires 10 be more than a random selection requires some guiding principle, or at any rate

Richard Nixon in 1983.

point of view. If Anson has one, it is hard to g out among these snarches of Nixomana. He uses anecdotes for the same reason other people climb mountains - they are there. Why

people climb mountains—they are there. Why else, for example, reprint as item from Newsweek about a sanitationman named Ray-Mackey greeting Nixon as he entered the Long Beach Memorial Hospital in 1974; "I hope everything's okay," Mackey called after him. Nixon said nothing."

You will also learn (if you didn't read it in Newsweek in 1976) that the Nixons attended a "s \$76-a-couple Bicentennial dinner-dance hosted by Ken Allan for 376 Nixon friends in the Grand Ballroom of the Newport Beach Marriott." Another piece of news is that on an early morning outing near Manhattan' Ceotral Park. Nixon studied the juggers carefully: "The men, he noticed, went about the routice absently, while the women seemed in deep concentration."

Even the more engaging episodes are of

Even the more engaging episodes are of small consequence, and most of those that caught my attention turned out to be unoriginal. The amusing little check-grabbing exchange between Nixon and his agent, Irving (Swifty) Lazar, over who should take possession of a \$200,000 down payment from David Frost on a television contract, comes from Frost's previously published memoir.

The report that an unnamed person heard Pat Nixon say to her husband on his last day in

the White House, "You have ruined my life." comes from an article by Seymour Hersh that appeared in The Atlantic last year. The description of Nixon's morning routine while he was in residence in New York City comes from The Daily News. One of Anson's few apparent scoops is that during a dioner in New York, Nixos kept addressing David Brinkley as Scheme

In sum, Anson has produced a gossipy, derivative, easy-to-read book of no particular significance. Give him a prize for trivial pur-

Mary Decker winning the 1,500-meter run in Helsinki with Zamira Zaitseva at her feet.

Decker Chooses 3,000-Meter Event for Olympics

By Jane Leavy

WASHINGTON - Mary Decker, the top woman distance runner in the United States, has decided to compete in the 3,000-meter event at

the Los Angeles Olympic Games.

Decker qualified for both the
1,500 meters and the 3,000 meters
at the Olympic trials, but ancounced she would not try to run both after losing in the final of the

"By no means do I want people to think I'm afraid to run the I,500," Decker said Wednesday in a telephone interview from Engene, Oregon. "I ran both to see if it was physically and psychologically pos-sible to double. I don't think it is. By the semis of the 1,500, I knew I shouldn't be doubling. I had to do

Decker said she chose the 3,000 meters because she feels it will be a higher quality race - the first confrontation between Decker and Zola Budd — and because of soreness in her right Achilles tendon, which she first experienced during last month's trials. She has oot run on the track since the trials, but expects to resume track workouts

"It's just something that acts up before the Olympics, but still isn't when I'm on the track too much," sure whether she will. she said. "Usually, I run on the

through the final of the 3,000 and race. I've never seen her have good the I,500. It didn't hurt to run on it. It seems to have quieted down." Decker said she ran in both to affect her to some degree."

Ruth Wysocki became the first lojuries have littered Decker's American woman to beat Decker at career; they kept her out of the Games. She has harbored fears

pics a third time, and although Brown says this injury was oever serious enough to jeopardize her participation in the Olympics, il

vas unsettling. Her double victory at Helsinki last summer engendered extraordioary expectations for Los Angeles. She says she isn't worried about people thinking less of her because she woo't be able to match that

"I think they'd think less of me if l went and didn't win, if I placed second or third in two events," she

Still, the decision wasn't easy. "It's tough because I love running the 1,500," she said. "I feel my chances to win are as good in either

To many, the 1,500 meters is the glamour event. "I don't consider it that way," she said. "I think there's just as much interest in the 3,000 as the 1,500. The only reason people remember the 1,500 more is because of the finish" in Helsinki, when Zamira Zaitseva of the Soviet Union was sprawled at Decker's feet as she crossed the finish line.

Was there a sense of loss in relinquishing the possibility of a repeal double?

"Anguish? Maybe a little bit," she said. "But now I have decided,

VANTAGE POINT/Steven Crist

Swale's Death Shows Gap in Research

NEW YORK -So Swale most likely died of beart failure after all. More than three weeks after having decided that this was not why the Kentucky Derby and Belmoot Stakes winner suddenly collapsed after a light morning gallop June 17, the pathologists and the veterinarians have found that it is the most plausible cause.

Having looked at thousands of samples under the microscope, they found a small area of scar tissue on the colt's heart, raising the possibility of an irregular beartbeat that could have led to cardiac

It is only a possibility, though, a scenario that the colt's devastated handlers and bewildered fans find comforting. Now there is a reason, they say, a logical explanation for his death. Some are even saying that perhaps a chronic heart problem explains his somewhat erratic form, explains the defeat in the Preakness, which cost him racing's Triple

That notion seems preposterous, for there was not so much qualitative difference as there seemed between Swale's good and bad races, and he was never a brilliant enough horse to deserve the Triple Crown.
The feeling around the race track is that the mystery is over and that it is time to bury the story along with the horse. But if Swale's death is written off as a heart attack, just one of those things that happen around the track, the sport will have lost an opportunity to teach itself

and its fans an important lessoo about the nature of horses. The point is that the health, the fitness and even the talent of thoroughbred race horses are more of a mystery than most people

_ Despite the sincerity, compassion and hard work of many veteri-

No one knows this better than the veterinarians close to the Swale ase, who tried to accentuate the uncertainties of their work while "dealing with questions from the public in the past few weeks.

Dr. Robert Fritz, Swale's veterinarian, stood silently through most of the autopsy on the day of the colt's death, answering occasional whispered questions and studying the pathologists' methodology. He was waiting for them to reach the colt's heart, where he and other veterinarians expected to find a ruptured artery. When the heart proved to have no visible ruptures or major lesions, the shock was visible on his face.

A few minutes later, as the pathologists scrubbed up and packed imples for later examination, Fritz stared at the colt's body on the floor of the autopsy lab and began to talk quietly.

"It's a deficiency of the veterinary profession, of which I'm a part. We just don't have the research and the money for it. We're frustrated. We're doing more and more, and things are getting better, but there's so much to know."

The thoroughhred horse supports a multibillion-dollar industry and belps maintain the fortunes of some of the wealthiest people in the world. But when these racing people talk about "doing something good for the game," they often mean something like the Breeders Cup, a series of rich races and bonuses that may attract new fans but will also help the rich get richer.

With a few exceptions, the philanthropists who keep stables indulge their charities away from the track. One often hears about a famous horse owner's making a major cootribution to a museum, a park or a hospital, but rarely to any project that would lead to further under-

standing of the animals that run for him. There is no inclination here to compare the worth of veterinary research 10 that of human medicine or even architectural preservation. But there is a stunning contrast between the millions of dollars that change hands among the wealthy at horse auctions and race tracks, and the lack of funds for the most basic research into how these horses live and die.

The money is out there in private hands, among those who derive so much pleasure and profit from their horses. Spending some of it on veterinary research would truly be doing something good for the

Swale: A logical, but fragile, explanation.

Belgian Wins 14th Leg of Cycle Tour

DOMAINE DU ROURET, France (Combined Dispatches) — Fons
de Wolf of Belgium won the 14th stage of the Tour de France cycle race over 227 kilometers (141 miles) from Rodez Thursday with a time of six

De Wolf broke away to finish almost 18 minutes ahead of four others, including Laurent Fignon and Bernard Hinault of France, who finished

in six hours, 18 minutes, 25 seconds. Vincent Barteau of France kept the overall lead for the ninth consecutive day. (Renters, UPI)

Ovett Withdraws From British Meet

LONDON (UPI) - Steve Ovett, who bolds the world record in the 1,500-meter run, has pulled out of a major international track and field meet because of a skin rash,

Ovett woo a 1,500-meter race in Lansanne, Switzerland, earlier this week despite the rash. But be withdrew Thursday from Friday's meet at the Crystal Palace in Loodon. Ovett, selected for both the 1,500 meters and 800 meters at the Los Angeles Olympics, has still to decide whether to represent Britain in a meet against Poland and Hungary Sunday at

Yankees Reportedly Release Dent
NEW YORK (AP) — Bucky Dent, who boped to return as the New York Yankees' shortstop after a minor league tryout, has been released by the club, according to The New York Times.

The Times reported Thursday that Dent's agent was told Wednesday by Clyde King, the general manager, and Bill Bergesch, the clob's vice president, that the team did ool have a spot for Dent on the roster. Dent, 32, was released by the Texas Rangers in spring-training and

signed on with the Columbus Clippers in hopes of making the Yankees. At Columbus, Dent batted .259 in 16 games. Dent played for New York from 1977 until 1981, when he was traded to the Rangers for outfielder Lee Mazzilli. In an II-year major-league career, Dent has a .247 batting

OBSERVER

Sorry, Right Number

EW YORK — It was on June N 19. 1984, that New York be-came a cellular town. A full-page advenisement in The New York Times carried the news. "Today, New York becomes a cellular town," said the headline.

Kehoe, once a milkman, hut now retired on account of being obso- man, puts me, Kegs Kepler, on lete, heard the news from his wife at hreakfast. "You won't believe this, Kehoe. " she said. "New York becomes a cellular town today."

mes a cellular town today."

"Cellular" asked Kehoe thing. The ability to reach any "Could that mean they're bringing other number in the world. back the horse-drawn milk wagon so I won't be obsolete anymore?" Stirred by the dreams of being employable again, he seized the paper and read:

Sometime today, somewhere in the greater New York and New Jersey area, some business person is going to make a telephone call. And

make history. Norma Van Von, brilliant maga-zine editor, detested people who phooed before hreakfast.

He may be on the George Washington Bridge. In the middle of Madison Avenue, On the Sproin Brook Parkway.

"Well, you don't sound to me like a business person," snarled Norma Van Von, "You sound to me like a husinessman with the wrong number . . . What's that? 'Don't I want to help you make history.' What kind of creep are you, making obscene phone calls before breakfast from the middle of Madison Avenue?" She tore her telephone out of the wall.

He may be driving at 55 miles per hour, Or stopped at a light. Or even caught in traffic.

Kegs Kepler, caught in traffic on to Norma, the Sprain Brook Parkway, didn't "Such a factorial to Norma." like it. Didn't like it one hit. Here he was, caught in traffic. And a bullet-riddled corpse in the car trunk. It violated the mob's basic sales offices. . rule: Stay out of traffic jams when transporting a hody.

And he'll reach for a telephone that's as simple to use as the phone in his office.

Fortunately, Kegs's car had a phone as simple to use as the phone in his office. He huzzed his secretary on the back seat. "Miss Porter, get Kehoe, the obsolete milkman, and tell him if he wants a carting

horse and milk wagon."

Before today, no such thing was possible. But now Priority One cellular service is here. And business will never he the same.

"He's got you on hold?" an irate Kegs Kepler roared at his secretary. "Kehoe, the obsolete milkhold?" He drew his pistol and riddled the phone with hullets.

"From my own car, any other number in the world? You're kidtelephone salesman. "I'll bet you can't reach the number of - oh, let's say - an obsolete milkman." At the wheel, the salesman was busy dialing and Norma was lost in fantasies of telephoning from the George Washington Bridge when they plowed into a traffic jam and hit Kegs Kepler's car with a jolt that threw open the trunk.

You can expedite projects. Leaping from his car, Kegs scowled at Norma and the salesman. "Look what you've done to the passenger in my trunk," he complained.

ignoring him, the salesman triumphantly handed the phone to Norma. "I have an obsolete milkman named Kehoe on the line," he said. "Forget the milkman," said Norma. "Call the police."

If all this sounds good to you, then arrange a free, no-obligation demonstration

"I'm afraid the police have put me on hold," said the salesman, while admiring the gun with which kegs gestured him into the car trunk. "You too, sister," Kegs said "Such a forceful man," said Nor-

ma. "Let's put this traffic jam behind us and elope." Just call any of the authorized "Miss Porter," said Kegs to his

secretary, "use this cellular phone to get me two tickets on the red-eye to Rio for tonight." He swept Norma into his arms. "As an editor," he said, "You'll

have to stop me from overpuoc-tuatiog people I don't like." And take your place in business

By Sandy Rovner Washington Post Service

WASHINGTON — He almost became a microbiologist. While he was still in college, at Dartmouth, be even discovered a new species of shrimp, and if he had continued in that field it would have been named after him: Eubrancibus Koopei. It was, he recalls, tempting, But instead he went on to medical school.

With his square-cut Dutch sea captain's beard and his steely blue eyes, Dr. C. Everett Koop, U. S. surgeon general, is a visual throwback to his Nieuw Amsterdam forebears. In the case of the 1690 Koops, "Nieuw" Brooklyn.

Today he looks even more the sea captain, circa a century or two ago. It's the uniform - an impressive ensemble, including a gold-buttoned jacket heavy with braid and ribbons. "Today I'm wearing it," Dr. Koop said, "because it is Wednesday, and Wedoesday is uniform day. Yesterday I wore it because I was cooducting a seminar, and Monday because I was making a

No one remembers when a sur-geon general last wore a uniform. Dr. Koop points out that the Pub-lic Health Service, part of which is still the surgeoo general's prov-ince, was the United States's first uniformed health service, and he insists that its restoration has been "a real morale booster."

Dr. Koop, 67, retired from more than two decades as chief of surgery at Children's Hospital in Philadelphia to accept President Ronald Reagan's appointment. He was 100 days too old, accord-ing to statute, and during the ef-out the agreement of parent or forts to change the law on his behalf, his evaogelical stands against abortion and for traditional roles for women became major considerations on Capitol diana, whose parents had won court approval of their decisino to Hill and in the popular media. He refuse potentially life-saving sur-quickly came to be called "Dr. gery for their child, Dr. Koop was Kook" behind his back, and he was expected to become to health issues what former Interior secre-ment of Health and Human Sertary James Watt became to envi-

Indeed, a recently proposed amendment to the Child Ahuse Act would make the withholding of medical treatment tantamouot to abuse under certain circumstances. The compromise would give physicians and hospitals leeway in refusing to take heroic measures when, for example, they would merely proloog dying. Many of the groups at odds over the Baby Doe issue have agreed to support the new legislative crite-ria, although the American Medieal Association still opposes them because they do not take into consideration "quality of life" issues.

Dr. Koop did not formally participate in the most recent negoti-

Dr. C. Everett Koop: "Bigger fish to fry."

the amendment is a good compromise, he says, "because it doesn't intrude excessively into the practice of medicine and does protect handicapped kids."

Sometimes Dr. Koop likes to say outrageous things for the sake of outrage, a habit that has gotten him ioto trouble. In a mostly tongue-in-cheek speech he made a few years ago to graduating osteo-paths, for example, he compared abortions to the willful cuthanizatioo of the elderly.

· But his medical reputation is enormous - he was a pioceer in pediatric surgery, well-known for his work in correcting handicaps in the newborn and in separating Siamese twins. His critics suggest that Dr.

Koop's compassion cuts little ice with the Reagan administration's health policy makers. Health and Human Services officials have testified in opposition to - or in favor of - cuts in most federal legislation and infant care programs. At the same time, health committee staffers note that Dr. getting more courage, and the ations, but he did play a key beKoop himself does not testify on more victories h
hind-the-scenes role. He thinks the infant care programs, and in courage he gets." Koop himself does not testify on more victories he wins, the more

fact, some Capitol Hill observers believe he has been deliberately isolated, restricted in his public statements to smoking, cancer and Baby Doc.

His stance as a point man on the anti-smoking issue has not only caused some of his critics to shift their ire elsewhere, but it has brought him a new set of critics. In North Carolina, Dr. Koop and his position have become issues in the current senatorial campaign. Democratie Governor James B. Hunt Jr., who is seeking to unseat conservative Republican Senator Jesse Helms, is painting the administration as insensitive to the tobacco industry, a serious charge indeed in tobacco's home state. Both men have denounced Dr. Koop.

"I wouldn't expect them to say anything else," says Dr. Koop.
"In fact, I'd feel slighted if they didn't. I think the response to the recent smoking report and my call for a smoke-free society by the year 2000 has been most encouraging. The militant nonsmoker is
